

## **Itron Named a Visionary in the 2021 Gartner Magic Quadrant for Managed IoT Connectivity Services, Worldwide**

March 30, 2021

*Report Recognizes Itron for its Ability to Execute and Completeness of Vision*

LIBERTY LAKE, Wash.--(BUSINESS WIRE)--Mar. 30, 2021-- Itron, Inc. (NASDAQ: ITRI), which is transforming the way utilities and cities manage energy and water, announced that it has been named a Visionary in the March 2021 Gartner Magic Quadrant for Managed IoT Connectivity Services, Worldwide<sup>1</sup>. According to Gartner, "The Managed IoT connectivity service market enables connectivity, data collection, and analysis and additional decision services that are necessary for connected solutions."

"We are proud to be named a Visionary by Gartner. We believe this report reinforces our position as an IoT platform solution provider for software and managed services, as well as data management, intelligent analytics and control systems for advanced utility and smart city use cases." said Don Reeves, senior vice president of Outcomes at Itron. "At Itron, we are focused on supporting utility and city customers by providing intelligently connected solutions such as traffic management, public safety, environmental sensing and more."

Itron's standards-based Industrial IoT (IIoT) platform, a multi-application, multi-transport network with distributed intelligence technology and data management capabilities, enables utilities and cities to deliver new services to customers and support a broad ecosystem of IIoT devices. By collaborating with its ecosystem of partners, Itron is continuously creating value-added applications and services that easily connect to its IIoT network. Itron's platform delivers reliable, resilient performance at a competitive price point for all the use cases a utility or city wants to enable via connectivity and inclusion of other IoT edge devices, analytics and a variety of communications options including RF mesh, cellular and more. Customers not only reduce their expenses but improve consumer engagement and distribution system resilience while increasing distributed energy resources.
