ITRON, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2009 (UNAUDITED)

In this Quarterly Report on Form 10-Q, the terms "we," "us," "our," "Itron," and the "Company" refer to Itron, Inc.

Note 1: Summary of Significant Accounting Policies

We were incorporated in the state of Washington in 1977. We provide a portfolio of products and services to utilities for the energy and water markets throughout the world.

Financial Statement Preparation

The condensed consolidated financial statements presented in this Quarterly Report on Form 10-Q are unaudited and reflect entries necessary for the fair presentation of the Consolidated Statements of Operations for the three and nine months ended September 30, 2009 and 2008, the Consolidated Balance Sheets as of September 30, 2009 and December 31, 2008, and the Consolidated Statements of Cash Flows for the nine months ended September 30, 2009 and 2008 of Itron, Inc. and its subsidiaries. All entries required for the fair presentation of the financial statements are of a normal recurring nature, except as disclosed.

Certain information and note disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) regarding interim results. These condensed consolidated financial statements should be read in conjunction with the 2008 audited financial statements and notes included in our Annual Report on Form 10-K, as filed with the SEC on February 26, 2009. The results of operations for the three and nine months ended September 30, 2009 are not necessarily indicative of the results expected for the full fiscal year or for any other fiscal period.

The Financial Accounting Standards Board (*FASB*) Accounting Standards CodificationTM (ASC), which became effective on July 1, 2009, is now the single source of authoritative GAAP, along with additional guidance issued by the SEC. All other accounting literature is now considered non-authoritative. For new accounting pronouncements issued by the FASB prior to the effective date of the ASC, we will continue to use the pre-ASC reference, e.g., FSP 14-1 or SFAS 167, for clarity, as the guidance in these recently released pronouncements is typically located in multiple subtopics and sections within the ASC. All other GAAP references in this Quarterly Report on Form 10-Q are from the ASC.

Basis of Consolidation

We consolidate all entities in which we have a greater than 50% ownership interest. We also consolidate entities in which we have a 50% or less investment and over which we have control. We use the equity method of accounting for entities in which we have a 50% or less investment and exercise significant influence. Entities in which we have less than a 20% investment and where we do not exercise significant influence are accounted for under the cost method. We consider for consolidation any variable interest entity of which we are the primary beneficiary. At September 30, 2009, investments in variable interest entities and noncontrolling interests were not material. Intercompany transactions and balances have been eliminated upon consolidation,

Change in Accounting Principle

On January 1, 2009, we adopted FASB Staff Position (FSP) APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)* (FSP 14-1). FSP 14-1 requires the convertible debt to be separated into its liability and equity components in a manner that reflects our non-convertible debt borrowing rate and must be applied retrospectively to all periods during which our convertible debt was outstanding. Our senior subordinated convertible notes (convertible notes) were issued in August 2006. Refer to Note 6 for further disclosure of the terms of the convertible notes and the adoption of FSP 14-1. (The guidance in FSP 14-1 is now embedded within ASC 470).

The impact of the adoption of FSP 14-1 on our results of operations, our financial position, and our cash flows is as follows:

	Three Months Ended Septembe			September 30, 2008 Nine Mon			Nine Month	ths Ended September 30, 2008

Cash and Cash Equivalents

We consider all highly liquid instruments with remaining maturities of three months or less at the date of acquisition to be cash equivalents.

Derivative Instruments

All derivative instruments, whether designated in hedging relationships or not, are recorded on the Consolidated Balance Sheets at fair value as either assets or liabilities. The components and fair values of our derivative instruments, which are primarily interest rate swaps, are determined using the fair value measurements of significant other observable inputs (Level 2), as defined by GAAP.

The net fair value of our derivative instruments may switch between a net asset and a net liability depending on market circumstances at the end of the period. We include the effect of our counterparty credit risk based on current published credit default swap rates when the net fair value of our derivative instruments are in a net asset position and the effect of our own nonperformance risk when the net fair value of our derivative instruments are in a net liability position. If the derivative is designated as a fair value hedge, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings. If the derivative is designated as a cash flow hedge, the effective portions of changes in the fair value of the derivative are recorded as a component of other comprehensive income (OCI) and are recognized in earnings when the hedged item affects earnings. If the derivative is a net investment hedge, the effective portion of any unrealized gain or loss is reported in accumulated OCI as a net unrealized gain or loss on derivative instruments. Ineffective portions of fair value changes or the changes in fair value of derivative instruments that do not qualify for hedging activities are recognized in other income (expense) in the Consolidated Statements of Operations. We classify cash flows from our derivative programs as cash flows from operating activities in the Consolidated Statements of Cash Flows.

Derivatives are not used for trading or speculative purposes. Most of our derivatives are with one counterparty, which is a major international financial institution, with whom we have a master netting agreement; however, our derivative positions are not disclosed on a net basis. There are no credit-risk-related contingent features within our derivative instruments. Refer to Note 7 and Note 12 for further disclosures of our derivative instruments and their impact on other comprehensive income (loss).

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable are recorded for invoices issued to customers in accordance with our contractual arrangements. Interest and late payment fees are minimal. Unbilled receivables are recorded when revenues are recognized upon product shipment or service delivery and invoicing occurs at a later date. The allowance for doubtful accounts is based on our historical experience of bad debts and our specific review of outstanding receivables at period end. Accounts receivable are written-off against the allowance when we believe an account, or a portion thereof, is no longer collectible.

Inventories

Inventories are stated at the lower of cost or market using the first-in, first-out method. Cost includes raw materials and labor, plus applied direct and indirect costs.

Property, Plant, and Equipment

Property, plant, and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, generally thirty years for buildings and three to five years for equipment, computers, and furniture. Leasehold improvements are capitalized and amortized over the term of the applicable lease, including renewable periods if reasonably assured, or over the useful lives, whichever is shorter. Costs related to internally developed software and software purchased for internal uses are capitalized and are amortized over the estimated useful lives of the assets. Repair and maintenance costs are expensed as incurred. We have no major planned maintenance activities.

We review long-lived assets for impairment whenever events or circumstances indicate the carrying amount of an asset or asset group may not be recoverable. We have had no significant impairments of long-lived assets. Assets held for sale are classified within other current assets in the Consolidated Balance Sheets, are reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated. We have no assets held for sale.

Business Combinations

On the date of acquisition, the assets acquired, liabilities assumed, and any noncontrolling interests in the acquiree are recorded at their fair values. The acquiree results of operations are also included as of the date of acquisition in the consolidated results. Intangible assets that arise from contractual/legal rights, or are capable of being separated, as well as in-process research and development (IPR&D), are measured and recorded at fair value. If practicable, assets acquired and liabilities assumed arising from contingencies are measured and recorded at fair value. If not practicable, such assets and liabilities are measured and recorded when it is probable that a gain or loss has occurred and the amount can be reasonably estimated. We will capitalize any future IPR&D as an intangible asset and amortize the balance over its estimated useful life (prior to January 1, 2009, we expensed acquired IPR&D in accordance with U.S. GAAP in effect at that time). The residual balance of the purchase price, after fair value allocations to all identified assets and liabilities, represents goodwill. Acquisition-related costs will be expensed as incurred. Restructuring costs are generally expensed in periods subsequent to the acquisition date, and changes in deferred tax asset valuation allowances and acquired income tax uncertainties after the measurement period are recognized as a component of provision for income taxes.

Goodwill and Intangible Assets

Goodwill and intangible assets result from our acquisitions. We use estimates in determining and assigning the fair value of goodwill and intangible assets, including estimates of useful lives of intangible assets, the amount and timing of related future cash flows, and fair values of the related operations. Our intangible assets have finite lives, are amortized over their estimated useful lives based on estimated discounted cash flows, and are tested for impairment when events or changes in circumstances indicate the carrying value may not be recoverable.

Goodwill is assigned to our reporting units based on the expected benefit from the synergies arising from each business combination, determined by using certain financial metrics, including the incremental discounted cash flows associated with each reporting unit. Goodwill is tested for impairment as of October 1 of each year, or more frequently if a significant impairment indicator occurs. Determining the fair value of a reporting unit is judgmental in nature and involves the use of significant estimates and assumptions. We forecast discounted future cash flows at the reporting unit level using risk-adjusted discount rates and estimated future revenues and operating costs, which take into consideration factors such as existing backlog, expected future orders, supplier contracts, and expectations of competitive and economic environments. We also identify similar publicly traded companies and develop a correlation, referred to as a multiple, to apply to the operating results of the reporting units.

Warranty

We offer standard warranties on our hardware products and large application software products. We accrue the estimated cost of warranty claims based on historical and projected product performance trends and costs. Testing of new products in the development stage helps identify and correct potential warranty issues prior to manufacturing. Continuing quality control efforts during manufacturing reduce our exposure to warranty claims. If our quality control efforts fail to detect a fault in one of our products, we could experience an increase in warranty claims. We track warranty claims to identify potential warranty trends. If an unusual trend is noted, an additional warranty accrual may be assessed and recorded when a failure event is probable and the cost can be reasonably estimated. Management continually evaluates the sufficiency of the warranty provisions and makes adjustments when necessary. The warranty allowances may fluctuate due to changes in estimates for material, labor, and other costs we may incur to repair or replace projected product failures, and we may incur additional warranty and related expenses in the future with respect to new or established products, which could adversely affect our gross profit. The long-term warranty balance includes estimated warranty claims beyond one year. Warranty expense is classified within cost of revenues.

Contingencies

A loss contingency is recorded if it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. We evaluate, among other factors, the degree of probability of an unfavorable outcome and our ability to make a reasonable estimate of the amount of the ultimate loss. Changes in these factors and related estimates could materially affect our financial position and results of operations.

Bonus and Profit Sharing

We have various employee bonus and profit sharing plans, which provide award amounts for the achievement of annual financial and nonfinancial targets. If management determines it probable that the targets will be achieved and the amounts can be reasonably estimated, a compensation accrual is recorded based on the proportional achievement of the financial and nonfinancial targets. Although we monitor and accrue expenses quarterly based on our progress toward the achievement of the annual targets, the actual results at the end of the year may require awards that are significantly greater or less than the estimates made in earlier quarters.

Defined Benefit Pension Plans

We sponsor both funded and unfunded non-U.S. defined benefit pension plans. We recognize a liability for the projected benefit obligation in excess of plan assets or an asset for plan assets in excess of the projected benefit obligation. We also recognize the funded status of our defined benefit pension plans on our Consolidated Balance Sheets and recognize as a component of other comprehensive income, net of tax, the actuarial gains or losses and prior service costs or credits, if any, that arise during the period but are not recognized as components of net periodic benefit cost.

Revenue Recognition

Revenues consist primarily of hardware sales, software license fees, software implementation, project management services, installation, consulting, and post-sale maintenance support.

Revenue arrangements with multiple deliverables are divided into separate units of accounting if the delivered item(s) have value to the customer on a standalone basis, there is vendor-specific objective evidence (VSOE) of fair value of both the delivered and undelivered item(s), and delivery/performance of the undelivered item(s) is probable. The total arrangement consideration is allocated among the separate units of accounting based on their relative fair values and the applicable revenue recognition criteria considered for each unit of accounting. For our standard contract arrangements that combine deliverables such as hardware, meter reading system software, installation, and project management services, each deliverable is generally considered a single unit of accounting. The amount allocable to a delivered item is limited to the amount that we are entitled to collect and that is not contingent upon the delivery/performance of additional items.

Revenues are recognized when (1) persuasive evidence of an arrangement exists, (2) delivery has occurred or services have been rendered, (3) the sales price is fixed or determinable, and (4) collectibility is reasonably assured. Hardware revenues are generally recognized at the time of shipment, receipt by customer, or, if applicable, upon completion of customer acceptance provisions. For software arrangements with multiple elements, revenue recognition is also dependent upon the availability of VSOE of fair value for each of the elements. The lack of VSOE, or the existence of extended payment terms or other inherent risks, may affect the timing of revenue recognition for software arrangements. If implementation services are essential to a software arrangement, revenue is recognized using either the percentage-of-completion methodology if project costs can be estimated or the completed contract methodology if project costs cannot be reliably estimated. Hardware and software post-sale maintenance support fees are recognized ratably over the life of the related service contract. Shipping and handling costs and incidental expenses billed to customers are recorded as revenue, with the associated cost charged to cost of revenues. We record sales, use, and value added taxes billed to our customers on a net basis in our Consolidated Statements of Operations.

Unearned revenue is recorded when a customer pays for products or services where the criteria for revenue recognition have not been met as of the balance sheet date. Unearned revenues of \$39.7 million and \$29.4 million at September 30, 2009 and December 31, 2008 related primarily to professional services and software associated with our OpenWay® contracts, extended warranty, and prepaid post contract support. Unearned revenue is recognized when the applicable revenue recognition criteria are met. Deferred cost is recorded for products or services for which ownership (typically defined as title and risk of loss) has transferred to the customer, but for which the criteria for revenue recognition have not been met as of the balance sheet date. Deferred costs are recognized when the applicable revenue recognition criteria are met. Deferred costs were \$17.5 million and \$11.0 million at September 30, 2009 and December 31, 2008.

Product and Software Development Costs

Product and software development costs primarily include employee compensation and third party contracting fees. For software we develop to be marketed or sold, we capitalize development costs after technological feasibility is established. Due to the relatively short period of time between technological feasibility and the completion of product and software development, and the immaterial nature of these costs, we generally do not capitalize product and software development expenses.

Stock-Based Compensation

We measure and recognize compensation expense for all stock-based awards made to employees and directors, including stock options, stock issued pursuant to our Employee Stock Purchase Plan (ESPP), and the issuance of restricted and unrestricted stock awards and units based on estimated fair values. The fair values of stock options and ESPP awards are estimated at the date of grant using the Black-Scholes option-pricing model, which includes assumptions for the dividend yield, expected volatility, risk-free interest rate, and expected life. For restricted and unrestricted stock awards and units, the fair value is the market close price of our common stock on the date of grant. We expense stock-based compensation, adjusted for estimated forfeitures, using the straight-line method over the vesting requirement. A substantial portion of our stock-based compensation cannot be expensed for tax purposes. When we have tax deductions in excess of the compensation cost, they are classified as financing cash inflows in the Consolidated Statements of Cash Flows.

Loss on Extinguishment of Debt, Net

Upon partial or full redemption of our borrowings, we recognize a gain or loss for the difference between the cash paid and the net carrying amount of the debt. Included in the net carrying amount is any unamortized premium or discount from the original issuance of the debt. Due to the particular characteristics of our convertible notes, upon conversion or derecognition of our convertible notes, we recognize a gain or loss for the difference between the fair value of the consideration transferred to the holder that is allocated to the liability component, which is equal to the fair value of the liability component immediately prior to extinguishment, and the net carrying amount of the liability component (including any unamortized discount and debt issuance costs). In the case of an induced conversion, a loss is recognized for the amount of the fair value of the securities or other consideration transferred to the holder in excess of fair value of the consideration issuable in accordance with the original conversion terms of the debt.

Income Taxes

The two primary objectives related to accounting for income taxes are to 1) recognize the amount of taxes payable or refundable for the current year and 2) recognize deferred tax liabilities and assets for the future tax consequences of events that have been recognized in our financial statements or tax returns. Deferred income taxes are recorded for the temporary differences between the financial reporting basis and tax basis of our assets and liabilities in each of the tax jurisdictions in which we operate. These deferred income taxes are measured using the tax rates expected to be in effect when the temporary differences reverse. We establish a valuation allowance related to a deferred income tax asset when we believe it is more likely than not that a portion of such asset will not be realized. Deferred income tax liabilities have not been recorded on undistributed earnings of international subsidiaries that are permanently reinvested.

We compute our interim income tax provision through the use of an estimated annual effective tax rate ('ETR') applied to year-to-date operating results and specific events that are discretely recognized as they occur. In determining the estimated annual ETR, we analyze various factors, including projections of our annual earnings, taxing jurisdictions in which the earnings will be generated, the impact of state and local income taxes, our ability to use tax credits and net operating loss carryforwards, and available tax planning alternatives. Discrete items, including the effect of changes in tax laws, tax rates, and certain circumstances with respect to valuation allowances or other unusual or non-recurring tax adjustments are reflected in the period in which they occur as an addition to, or reduction from, the income tax provision, rather than included in the estimated annual ETR.

We recognize and measure tax positions taken, or expected to be taken, in a tax return that affect amounts in our financial statements. A tax position is first evaluated for recognition based on its technical merits. Tax positions that have a greater than fifty percent likelihood of being realized upon ultimate settlement are then measured to determine amounts to be recognized in the financial statements. This measurement incorporates information about potential settlements with taxing authorities. We classify interest expense and penalties related to uncertain tax positions and interest income on tax overpayments as part of income tax expense.

Foreign Exchange

Our condensed consolidated financial statements are reported in U.S. dollars. Assets and liabilities of international subsidiaries with a non-U.S. dollar functional currency are translated to U.S. dollars at the exchange rates in effect on the balance sheet date, or the last business day of the period, if applicable. Gains and losses that arise from exchange rate fluctuations for asset and liability balances that are not denominated in an entity's functional currency are included in the Consolidated Statements of Operations. Currency gains and losses of intercompany balances deemed to be long-term in nature or designated as a hedge of the net investment in international subsidiaries are included, net of tax, in accumulated other comprehensive income in shareholders' equity. Revenues and expenses for these subsidiaries are translated to U.S. dollars using a weighted average rate for the relevant reporting period. Translation adjustments resulting from this process are included, net of tax, in accumulated other comprehensive income in shareholders' equity.

Fair Value Measurements

The fair value hierarchy prioritizes the inputs used in different valuation methodologies, assigning the highest priority to unadjusted quoted prices for identical assets and liabilities in actively traded markets (Level 1) and the lowest priority to unobservable inputs (Level 3). Level 2 inputs consist of quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in non-active markets; and model-derived valuations in which significant inputs are corroborated by observable market data either directly or indirectly through correlation or other means (inputs may include yield curves, volatility, credit risks, and default rates). For fair value measurements using Level 3 inputs, a reconciliation of the beginning and ending balances is required. The effective date for applying the fair value measurement criteria in accordance with FASB ASC 820-10-20, *Fair Value Measurements*, was January 1, 2009 for nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually).

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Due to various factors affecting future costs and operations, actual results could differ materially from these estimates.

Reclassifications

See *Change in Accounting Principle* for the impact of the adoption of FSP 14-1.

New Accounting Pronouncements

In December 2008, the FASB issued FSP FAS 132(R)-1, *Employers' Disclosures about Postretirement Benefit Plan Assets*, which amends Statement of Financial Accounting Standards (SFAS) 132(R), *Employer's Disclosures about Pensions and Other Postretirement Benefits*, to require additional fair value disclosures about assets held in an employer's defined benefit pension or other postretirement plan. This FSP is effective for our December 31, 2009 Annual Report on Form 10-K. (The guidance in FSP FAS 132(R)-1 is now embedded within ASC 715.)

In June 2009, the FASB issued SFAS 167, *Amendments to FASB Interpretation No. 46(R)*. This Statement requires an enterprise to perform additional analyses to assess variable interest entities (VIE's) and the enterprise's involvement with these entities, as well provide additional disclosures. SFAS 167 will be effective for Itron on January 1, 2010. We do not expect SFAS 167 to have a material impact to our consolidated financial statements. (The guidance in SFAS 167 is now embedded within ASC 810.)

The FASB issued Accounting Standards Update (ASU) 2009-5, *Measuring Liabilities at Fair Value (ASU 2009-5)*, in August 2009. ASU 2009-5 reaffirms that fair value measurement of a liability assumes the transfer of a liability to a market participant as of the measurement date and is therefore presumed to continue and is not settled with the counterparty. This ASU also states that the fair value measurement of a liability includes nonperformance risk and that such risk does not change after transfer of the liability. ASU 2009-5 will be effective for us on October 1, 2009, and we do not expect it to have a material impact on our consolidated financial statements.

In October 2009, the FASB issued ASU No. 2009-13, *Revenue Recognition (Topic 605) – Multiple-Deliverable Revenue Arrangements (a consensus of the FASB Emerging Issues Tax Force)* (ASU 2009-13). The objective of ASU 2009-13 is to address the accounting for multiple-deliverable arrangements (previously known as EITF 00-21) to enable vendors to account for more products or services separately rather than as a combined unit. The hierarchy for establishing a selling price has been increased and consists of the following: (1) vendor specific objective evidence (VSOE), if available, (2) third party evidence (TPE), if VSOE is not available, and (3) estimated selling price, if VSOE and TPE are not available. The amendments in ASU 2009-13 will also (1) replace the term *fair value* with *selling price* to clarify that the allocation of revenue is based on entity-specific assumptions rather than assumptions of a market-place participant; and (2) eliminate the residual value method of allocation and require that arrangement consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method. ASU 2009-13 also requires additional disclosures about an entity's multiple-deliverable contracts. ASU 2009-13 is effective for us on January 1, 2011, with early adoption permitted. We are currently considering an early adoption of this guidance on January 1, 2010, to be applied on a prospective basis. We do not expect ASU 2009-13 to have a material impact on our consolidated financial statements.

Concurrent with the issuance of ASU 2009-13, the FASB issued ASU No. 2009-14, *Software (Topic 985)*, *Certain Revenue Arrangements That Include Software Elements (a consensus of the FASB Emerging Issues Task Force)* (ASU 2009-14). ASU 2009-14 affects revenue arrangements that include both tangible products and software elements, and it provides a scope exception from software revenue recognition guidance in ASC 985-605 (previously known as SOP 97-2) for tangible products containing software and non-software components that function together to deliver the tangible product's essential functionality. Revenue arrangements that are affected by this guidance will still be subject to the disclosure requirements of ASU 2009-13, as applicable. ASU 2009-14 is effective for us on January 1, 2011, with early adoption permitted. We are currently considering an early adoption of this guidance on January 1, 2010, to be applied on a prospective basis. ASU 2009-14 may impact the timing of revenue for our tangible hardware products sold under new arrangements in the future.

Note 2: Earnings Per Share and Capital Structure

The following table sets forth the computation of basic and diluted earnings per share (EPS):

	Thre	e Months Ended S	eptember 30,	Nine Months Ended	September 30,		
		2009	2008	2009	2008		
Net income (loss) available to common shareholders	\$	(2,962) \$	5,600 \$	5 (7,402) \$	17,642		
Weighted average common shares outstanding - Basic		40,039	34,385	38,003	32,632		
Dilutive effect of stock-based awards		-	760	-	762		
Dilutive effect of convertible notes		-	1,727	-	1,597		
Weighted average common shares outstanding - Diluted		40,039	36,872	38,003	34,991		
Basic earnings (loss) per common share	\$	(0.07) \$	0.16	(0.19) \$	0.54		
Diluted earnings (loss) per common share	\$	(0.07) \$	0.15	(0.19) \$	0.50		

Common Stock

During the first quarter of 2009, we completed exchanges with certain holders of our convertible notes in which we issued, in the aggregate, approximately 2.3 million shares of common stock valued at \$132.9 million, in exchange for, in the aggregate, \$121.0 million principal amount of the convertible notes. See Note 6 for a further discussion.

On June 3, 2009, we completed a public offering of approximately 3.2 million shares of common stock for net proceeds of \$160.4 million.

Stock-based Awards

For stock-based awards, the dilutive effect is calculated using the treasury stock method. Under this method, the dilutive effect is computed as if the awards were exercised at the beginning of the period (or at time of issuance, if later) and assumes the related proceeds were used to repurchase common stock at the average market price during the period. Related proceeds include the amount the employee must pay upon exercise, future compensation cost associated with the stock award, and the amount of excess tax benefits, if any. As a result of our net loss for the nine months ended September 30, 2009, there was no dilutive effect to the weighted average common shares outstanding. Approximately 1.0 million and 268,000 stock-based awards were excluded from the calculation of diluted EPS for the three months ended September 30, 2009 and 2008, and approximately 1.0 million and 170,000 stock-based awards were excluded from the calculation of diluted EPS for the nine months ended September 30, 2009 and 2008 because they were anti-dilutive. These stock-based awards could be dilutive in future periods.

Convertible Notes

We are required, pursuant to the indenture for the convertible notes, to settle the principal amount of the convertible notes in cash and may elect to settle the remaining conversion obligation (stock price in excess of conversion price) in cash, shares, or a combination. We include the amount of shares it would take to satisfy the conversion obligation, assuming that all of the convertible notes are converted. The average closing prices of our common stock for the three and nine months ended September 30, 2009 and 2008 were used as the basis for determining the dilutive effect on EPS. The average price of our common stock for the three and nine months ended September 30, 2009 did not exceed the conversion price of \$65.16 and, therefore, did not have an effect on diluted EPS. The average price of our common stock for the three and nine months ended September 30, 2008 exceeded the conversion price of \$65.16 and, therefore, approximately 1.7 million and 1.6 million shares, respectively, were included as dilutive shares in the calculation of diluted EPS.

Preferred Stock

We have authorized the issuance of 10 million shares of preferred stock with no par value. In the event of a liquidation, dissolution, or winding up of the affairs of the corporation, whether voluntary or involuntary, the holders of any outstanding preferred stock will be entitled to be paid a preferential amount per share to be determined by the Board of Directors prior to any payment to holders of common stock. Shares of preferred stock may be converted into common stock based on terms, conditions, rates, and subject to such adjustments as set by the Board of Directors. There was no preferred stock sold or outstanding at September 30, 2009 and December 31, 2008.

Note 3: Certain Balance Sheet Components

Accounts receivable, net	At Sep	ptember 30, 2009	At I	December 31, 2008
	<u>-</u>	(in thou	ısands)
Trade receivables (net of allowance of \$6,904 and \$5,954)	\$	304,443	\$	306,593
Unbilled revenue		20,676		14,685
Total accounts receivable, net	\$	325,119	\$	321,278

A summary of the allowance for doubtful accounts activity is as follows:

	Three	Months Ended S	eptember 30,	Nine Months Ended September				
	2009		2008	2009	2008			
			(in thousa	nds)				
Beginning balance	\$	7,271 \$	6,408 \$	5,954 \$	6,391			
Actaris acquisition opening balance/adjustments		-	-	-	(471)			
Provision for (release of) doubtful accounts, net		(378)	314	1,512	1,057			
Accounts written off		(112)	(105)	(748)	(661)			
Effects of change in exchange rates		123	(313)	186	(12)			
Ending balance, September 30	\$	6,904 \$	6,304 \$	6,904 \$	6,304			

Inventories	At Se	eptember 30, 2009	At December 31, 2008		
	'	(in thou	ıs <mark>ands)</mark>		
Materials	\$	90,836	\$	85,153	
Work in process		18,186		14,556	
Finished goods		68,744		64,501	
Total inventories	\$	177,766	\$	164,210	

Our inventory levels may vary period to period as a result of our factory scheduling and timing of contract fulfillments.

Consigned inventory is held at third-party locations; however, we retain title to the inventory until purchased by the third-party. Consigned inventory, consisting of raw materials and finished goods, was \$13.6 million and \$19.1 million at September 30, 2009 and December 31, 2008, respectively.

Property, plant, and equipment, net	At September 30, 2009			ecember 31, 2008
		(in tho	ıs <mark>ands)</mark>	
Machinery and equipment	\$	232,778	\$	195,677
Computers and purchased software		65,131		58,505
Buildings, furniture, and improvements		142,915		132,195
Land		37,522		33,702
Construction in progress, including purchased equipment		20,139		30,632
Total cost		498,485		450,711
Accumulated depreciation		(182,518)		(142,994)
Property, plant, and equipment, net	\$	315,967	\$	307,717

Depreciation expense was \$14.3 million and \$13.5 million for the three months ended September 30, 2009 and 2008, and \$41.0 million and \$40.2 million for each of the nine months ended September 30, 2009 and 2008, respectively.

Note 4: Intangible Assets

The gross carrying amount and accumulated amortization of our intangible assets, other than goodwill, are as follows:

		At	September 3	0, 2009			At	В				
		Accumulated					Accumulated					
	Gr	oss Assets	Amortizati	on	Net Gross A		oss Assets	Amortization	Net			
					(in thou	sand	s)					
Core-developed technology	\$	401,827	\$ (232	,546) \$	169,281	\$	394,912	\$ (188,953) \$	205,959			
Customer contracts and relationships		310,356	(84	,726)	225,630		299,928	(56,966)	242,962			
Trademarks and trade names		78,250	(55	,552)	22,698		76,766	(45,851)	30,915			
Other		24,799	(23	,272)	1,527		24,630	(22,580)	2,050			
Total intangible assets	\$	815,232	\$ (396	,096) \$	419,136	\$	796,236	\$ (314,350)	481,886			

A summary of the intangible asset account activity is as follows:

	Three Months Ended September 30,			September 30,	Nine Months End	eptember 30,					
	2009		2009		2008		2008 2009		2009		2008
				(in thousa	nds)						
Beginning balance, intangible assets, gross	\$	792,551	\$	864,049 \$	796,236	\$	895,979				
Adjustment of previous acquisitions		-		-	-		(70,048)				
Effect of change in exchange rates		22,681		(49,053)	18,996		(10,935)				
Ending balance, intangible assets, gross	\$	815,232	\$	814,996 \$	815,232	\$	814,996				

During the first quarter of 2008, intangible assets were adjusted by \$70.0 million based on our completion of the fair value assessment associated with the Actaris Metering Systems SA (Actaris) acquisition in 2007.

Intangible assets are recorded in the functional currency of our international subsidiaries; therefore, the carrying amount of intangible assets increase or decrease, with a corresponding change in accumulated other comprehensive income, due to changes in foreign currency exchange rates. Intangible asset amortization expense was \$25.1 million and \$30.4 million for the three months ended September 30, 2009 and 2008, and \$72.8 million and \$93.1 million for the nine months ended September 30, 2009 and 2008, respectively.

Estimated future annual amortization expense is as follows:

Years ending December 31,		ed Annual rtization
	(in the	ousands)
2009 (amount remaining at September 30, 2009)	\$	25,609
2010		74,253
2011		63,550
2012		49,201
2013		39,901
Beyond 2013		166,622
Total intangible assets, net	\$	419,136

Note 5: Goodwill

The following table reflects goodwill allocated to each reporting segment at September 30, 2009 and 2008:

	Itron North America		Itron International (in thousands)		To	tal Company
Goodwill balance at January 1, 2008	\$	185,869	\$	1,080,264	\$	1,266,133
Adjustment of previous acquisitions		-		55,370		55,370
Effect of change in exchange rates		(663)		(3,936)		(4,599)
Goodwill balance at September 30, 2008	\$	185,206	\$	1,131,698	\$	1,316,904
Goodwill balance at January 1, 2009	\$	184,535	\$	1,101,318	\$	1,285,853
Adjustment of previous acquisitions		2,100		-		2,100
Effect of change in exchange rates		1,232		34,747		35,979
Goodwill balance at September 30, 2009	\$	187,867	\$	1,136,065	\$	1,323,932

In 2009, we made refinements to our management reporting and geographic reporting structure between our International and North America operations. Itron North America now includes sales of gas and water meters in North America, which were previously part of Itron International. The allocation of goodwill to our reporting units is based on our current segment reporting structure; therefore we have reallocated \$57.5 million between the operating segments. Historical segment information has been restated from the segment information previously provided to conform to our current segment reporting structure after the refinement.

In 2009, \$2.1 million of contingent consideration became payable associated with two acquisitions in 2006, which is reflected as *adjustment of previous acquisitions*.

In 2008, the *adjustment of previous acquisitions* represents an adjustment to goodwill associated with the 2007 Actaris acquisition based on our final determination of fair values of certain assets acquired and liabilities assumed.

Note 6: Debt

The components of our borrowings are as follows:

	At Se	t September 30, 2009		ecember 31, 2008	
		(in thousands)			
Term loans					
USD denominated term loan	\$	301,205	\$	375,744	
EUR denominated term loan		316,981		360,494	
Convertible senior subordinated notes		205,758		306,337	
Senior subordinated notes		-		109,192	
		823,944		1,151,767	
Current portion of long-term debt		(10,953)		(10,769)	
Total long-term debt	\$	812,991	\$	1,140,998	

Credit Facility

The Actaris acquisition in 2007 was financed in part by a \$1.2 billion credit facility. The credit facility, dated April 18, 2007, was composed of a \$605.1 million first lien U.S. dollar denominated term loan; a €335 million first lien euro denominated term loan; a £50 million first lien pound sterling denominated term loan (collectively the term loans); and a \$115 million multicurrency revolving line-of-credit (revolver). Our loan balances denominated in currencies other than the U.S. dollar fluctuate due to currency exchange rates. The principal balance of our euro denominated term loan at September 30, 2009 and December 31, 2008 was €216.6 million and €254.1 million, respectively. Interest rates on the credit facility are based on the respective borrowing's denominated London Interbank Offered Rate (LIBOR) or the Wells Fargo Bank, National Association's prime rate, plus an additional margin subject to our consolidated leverage ratio. The additional interest rate margin was 3.75% at September 30, 2009 and 1.75% at December 31, 2008. Our interest rates were 4.02% for the U.S. dollar denominated and 4.87% for the euro denominated term loans at September 30, 2009. Scheduled amortization of principal payments is 1% per year (0.25% quarterly) with an excess cash flow provision for additional annual principal repayment requirements. Maturities of the term loans and multicurrency revolver are seven years and six years from the date of issuance, respectively. The credit facility is secured by substantially all of the assets of Itron, Inc., our operating subsidiaries, except our international subsidiaries, and includes covenants, which contain certain financial ratios and place restrictions on the incurrence of debt, the payment of dividends, certain investments, incurrence of capital expenditures above a set limit, and mergers. On April 24, 2009, we amended our credit facility to adjust the maximum total leverage ratio and the minimum interest coverage ratio thresholds to increase operational flexibility. The amendment also allows us to seek a \$75 million increase to the \$115 million multicurrency revolving line-of-credit without further amendment. The current lending participants may then choose to increase their level of participation or approve the participation of additional lenders. (The amendment was filed with the SEC on April 27, 2009 as Exhibit 4.1 to our Current Report on Form 8-K.) Prepaid debt fees of approximately \$3.7 million were capitalized for the amendment and legal and advisory fees of \$1.5 million were expensed as the amendment did not substantially modify the original terms of the loan. At September 30, 2009, we were in compliance with the debt covenants under this credit facility.

At September 30, 2009, there were no borrowings outstanding under the revolver and \$48.4 million was utilized by outstanding standby letters of credit resulting in \$66.6 million being available for additional borrowings.

We repaid \$57.0 million and \$127.2 million of the term loans during the three and nine months end September 30, 2009, respectively. Repayments of \$24.6 million and \$369.0 million were made during the three and nine months ended September 30, 2008, respectively.

Senior Subordinated Notes

In May 2004, we issued \$125 million of 7.75% senior subordinated notes (subordinated notes), which were discounted to a price of 99.265 to yield 7.875%. On July 17, 2009, we paid \$113.2 million, including accrued interest of \$1.5 million, to redeem all of our subordinated notes. The subordinated notes had a remaining principal value of \$109.6 million and were due May 2012. We redeemed the notes at 101.938% of the principal amount, and recognized a loss on extinguishment of \$2.5 million, which included the remaining unamortized debt discount of \$336,000. Unamortized prepaid debt fees of \$2.0 million were recorded to interest expense.

Convertible Senior Subordinated Notes

On August 4, 2006, we issued \$345 million of 2.50% convertible notes due August 2026. Fixed interest payments are required every six months, in February and August of each year. For each six month period beginning August 2011, contingent interest payments of approximately 0.19% of the average trading price of the convertible notes will be made if certain thresholds and events are met, as outlined in the indenture. The convertible notes are registered with the SEC and are generally transferable. Our convertible notes are not considered conventional convertible debt as the number of shares, or cash, to be received by the holders was not fixed at the inception of the obligation. We have concluded that the conversion feature of our convertible notes does not need to be bifurcated from the host contract and accounted for as a freestanding derivative, as the conversion feature is indexed to our own stock and would be classified within stockholders' equity if it were a freestanding instrument.

The convertible notes may be converted at the option of the holder at a conversion rate of 15.3478 shares of our common stock for each \$1,000 principal amount of the convertible notes, under the following circumstances, as defined in the indenture (filed with the SEC on November 6, 2006 as Exhibit 4.16 to our Quarterly Report on Form 10-Q):

- o if the closing sale price per share of our common stock exceeds \$78.19, which is 120% of the conversion price of \$65.16, for at least 20 trading days in the 30 consecutive trading day period ending on the last trading day of the preceding fiscal quarter;
- o between July 1, 2011 and August 1, 2011, and any time after August 1, 2024;
- o during the five business days after any five consecutive trading day period in which the trading price of the convertible notes for each day was less than 98% of the conversion value of the convertible notes;
- o if the convertible notes are called for redemption;
- o if a fundamental change occurs; or
- o upon the occurrence of defined corporate events.

The amount payable upon conversion is the result of a formula based on the closing prices of our common stock for 20 consecutive trading days following the date of the conversion notice. Based on the conversion ratio of 15.3478 shares per \$1,000 principal amount of the convertible notes, if our stock price is lower than the conversion price of \$65.16, the amount payable will be less than the \$1,000 principal amount and will be settled in cash. Our closing stock price at September 30, 2009 was \$64.14.

Upon conversion, the principal amount of the convertible notes will be settled in cash and, at our option, the remaining conversion obligation (stock price in excess of conversion price) may be settled in cash, shares, or a combination. The conversion rate for the convertible notes is subject to adjustment upon the occurrence of certain corporate events, as defined in the indenture, to ensure that the economic rights of the convertible note holders are preserved.

The convertible notes also contain purchase options, at the option of the holders, which if exercised would require us to repurchase all or a portion of the convertible notes on August 1, 2011, August 1, 2016, and August 1, 2021 at 100% of the principal amount, plus accrued and unpaid interest.

On or after August 1, 2011, we have the option to redeem all or a portion of the convertible notes at a redemption price equal to 100% of the principal amount plus accrued and unpaid interest.

The convertible notes are unsecured, subordinated to our credit facility (senior secured borrowings), and are guaranteed by all of our operating subsidiaries, except for our international subsidiaries. The convertible notes contain covenants, which place restrictions on the incurrence of debt and certain mergers. We were in compliance with these debt covenants at September 30, 2009.

As our stock price is subject to fluctuation, the contingent conversion threshold may be triggered during any quarter, prior to July 2011, and the notes become convertible. At September 30, 2009 and December 31, 2008, the contingent conversion threshold was not exceeded and, therefore, the aggregate principal amount of the convertible notes is included in long-term debt.

On January 1, 2009, we adopted FSP 14-1, which requires the convertible debt to be separated between its liability and equity components, in a manner that reflects our non-convertible debt borrowing rate and must be applied retroactively to all periods presented. Our non-convertible debt borrowing rate at the time of the issuance of our convertible notes was determined to be 7.38%, which also reflects the effective interest rate on the liability component. See Note 1 for disclosure about the financial statement impact of our adoption of FSP 14-1.

The carrying amounts of the debt and equity components are as follows:

	At Septemb 2009	er 30,	At D	ecember 31, 2008
		(in thous	ands)	
Face value of convertible debt	\$ 2	23,604	\$	344,588
Unamortized discount	(17,846)		(38,251)
Net carrying amount of debt component	\$ 2	05,758	\$	306,337
Carrying amount of equity component	\$	31,831	\$	41,177

The interest expense relating to both the contractual interest coupon and amortization of the discount on the liability component are as follows:

	Three Months Ended September 30,			Nine Months Ended September 30,			
	2009		2008	2009	2008		
			(in thous	ands)			
Contractual interest coupon	\$	1,398 \$	2,156 \$	4,442	\$ 6,469		
Amortization of the discount on the liability component		2,367	3,393	7,262	9,995		
Total interest expense	\$	3,765 \$	5,549 \$	11,704	\$ 16,464		

Due to the combination of put, call, and conversion options that are part of the terms of the convertible note agreement, the remaining discount on the liability component will be amortized over 21 months.

During the first quarter of 2009, we entered into exchange agreements with certain holders of our convertible notes to issue, in the aggregate, approximately 2.3 million shares of common stock, valued at \$132.9 million, in exchange for, in the aggregate, \$121.0 million principal amount of the convertible notes, representing 35% of the aggregate principal outstanding at the date of the exchanges. All of the convertible notes we acquired pursuant to the exchange agreements were retired upon the closing of the exchanges.

The exchange agreements were treated as induced conversions as the holders received a greater number of shares of common stock than would have been issued under the original conversion terms of the convertible notes. At the time of the exchange agreements, none of the conversion contingencies were met. Under the original terms of the convertible notes, the amount payable on conversion was to be paid in cash, and the remaining conversion obligation (stock price in excess of conversion price) was payable in cash or shares, at our option. Under the terms of the exchange agreements, all of the settlement was paid in shares. The difference in the value of the shares of common stock sold under the exchange agreement and the value of the shares used to derive the amount payable under the original conversion agreement resulted in a loss on extinguishment of debt of \$23.3 million (the inducement loss). As required by FSP 14-1, upon derecognition of the convertible notes, we remeasured the fair value of the liability and equity components using a borrowing rate for similar non-convertible debt that would be applicable to us at the date of the exchange agreements. Because borrowing rates increased, the remeasurement of the components of the convertible notes resulted in a gain on extinguishment of \$13.4 million (the revaluation gain). As a result, we recognized a net loss on extinguishment of debt of \$10.3 million, calculated as the inducement loss, plus an allocation of advisory fees less the revaluation gain.

Prepaid Debt Fees & Accrued Interest Expense

Prepaid debt fees represent the capitalized direct costs incurred related to the issuance of debt and are recorded as noncurrent assets. These costs are amortized to interest expense over the lives of the respective borrowings using the effective interest method. When debt is repaid early, or first becomes convertible as in the case of our convertible notes, the related portion of unamortized prepaid debt fees is written-off and included in interest expense. Total unamortized prepaid debt fees were \$10.4 million and \$12.9 million at September 30, 2009 and December 31, 2008, respectively. Accrued interest expense was \$900,000 and \$4.5 million at September 30, 2009 and December 31, 2008, respectively.

Note 7: Derivative Financial Instruments and Hedging Activities

As part of our risk management strategy, we use derivative instruments to hedge certain foreign currency and interest rate exposures. Refer to Note 1, Note 12, and Note 13 for additional disclosures on our derivative instruments.

The fair values of our derivative instruments are determined using the income approach and significant other observable inputs (also known as "Level 2"), as defined by ASC 820-10-20, *Fair Value Measurements*. We have used observable market inputs based on the type of derivative and the nature of the underlying instrument. The key inputs used at September 30, 2009 included interest rate yield curves (swap rates and futures) and foreign exchange spot and forward rates, all of which are available in an active market. We have utilized the mid-market pricing convention for these inputs at September 30, 2009. We include the effect of our counterparty credit risk based on current published credit default swap rates when the net fair value of our derivative instruments are in a net liability position. We have considered our own nonperformance risk by discounting our derivative liabilities to reflect the potential credit risk to our counterparty by applying a current market indicative credit spread to all cash flows.

The fair values of our derivative instruments determined using the fair value measurement of significant other observable inputs (Level 2) at September 30, 2009 and December 31, 2008 are as follows:

			Fair V	/alue
	Balance Sheet Location	At September 30, 2009		At December 31, 2008
Asset Derivatives			(in thou	sands)
Derivatives not designated as hedging instruments under ASC 815-20

Derivatives not designated as hedging instruments under ASC 815-20				
Foreign exchange forward contracts	Other current liabilities	\$	(1,096)	\$ (67)
Total liability derivatives		\$	(336,215)	\$ (378,056)

^{*} The euro denominated term loan is a nonderivative financial instrument designated as a hedge of our net investment in international operations. It is recorded at the carrying value in the Consolidated Balance Sheets and not recorded at fair value.

Other comprehensive income (loss) during the reporting period for our derivative and nonderivative instruments designated as hedging instruments (collectively, hedging instruments), net of tax, was as follows:

	 2009	20	800
	 (in thou	ısands)	
Net unrealized loss on hedging instruments at January 1,	\$ (29,734)	\$	(26,503)
Unrealized gain (loss) on derivative instruments	(5,906)		1,520
Unrealized loss on a nonderivative hedging instrument	(5,676)		(8)
Realized (gains) losses reclassified into net income (loss)	6,025		(294)
Net unrealized loss on hedging instruments at September 30,	\$ (35,291)	\$	(25,285)

Cash Flow Hedges

We are exposed to interest rate risk through our credit facility. We enter into swaps to achieve a fixed rate of interest on the hedged portion of debt in order to increase our ability to forecast interest expense. The objective of these swaps is to protect us from increases in borrowing rates on our floating rate credit facility.

We have entered into one-year pay-fixed receive one-month LIBOR interest rate swaps to convert \$200 million of our U.S. dollar term loan from a floating interest rate to a fixed interest rate, as follows:

Transaction Date	Effective Date of Swap	Notional amount		Fixed Interest Rate
		(in t	housands)	
June 26, 2008	June 30, 2008 - June 30, 2009	\$	200,000	3.01%
October 27, 2008	June 30, 2009 - June 30, 2010	\$	200,000	2.68%
July 1, 2009	June 30, 2010 - June 30, 2011	\$	100,000	2.15%
July 1, 2009	June 30, 2010 - June 30, 2011	\$	100.000	2.11%

At September 30, 2009, our U.S. dollar term loan had a balance of \$301.2 million. The cash flow hedges have been and are expected to be highly effective in achieving offsetting cash flows attributable to the hedged risk through the term of the hedge. Consequently, effective changes in the fair value of the interest rate swap are recorded as a component of OCI and are recognized in earnings when the hedged item affects earnings. The amounts paid or received on the hedge are recognized as adjustments to interest expense. The amount of net losses expected to be reclassified into earnings in the next 12 months is approximately \$4.0 million, which was based on the Bloomberg U.S. dollar swap yield curve as of September 30, 2009.

In 2007, we entered into a pay-fixed 6.59% receive three-month Euro Interbank Offered Rate (EURIBOR) amortizing interest rate swap to convert a significant portion of our euro denominated variable-rate term loan to fixed-rate debt. The cash flow hedge is currently, and is expected to be, highly effective in achieving offsetting cash flows attributable to the hedged risk through the term of the hedge. Consequently, effective changes in the fair value of the interest rate swap are recorded as a component of OCI and are recognized in earnings when the hedged item affects earnings. The amounts paid or received on the hedge are recognized as adjustments to interest expense. The notional amount of the swap is reduced each quarter and was \$280.4 million (€191.6 million) at September 30, 2009. The amount of net losses expected to be reclassified into earnings in the next 12 months is approximately \$9.1 million (€6.2 million), which was based on the Bloomberg U.S. dollar swap yield curve as of September 30, 2009.

We will continue to monitor and assess our interest rate risk and may institute additional interest rate swaps or other derivative instruments to manage such risk in the future.

The before tax effect of our cash flow derivative instruments on the Consolidated Balance Sheets and the Consolidated Statements of Operations for the three and nine months ended September 30 is as follows:

Derivatives in ASC 815-20 Cash Flow Hedging Relationships	Ì	Amount o loss) Recog OCI on Des Effective F	nized in	Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)			` '	Recognized in Inve

				17							

Net Investment Hedges

We are exposed to foreign exchange risk through our international subsidiaries. As a result of our acquisition of an international company, we entered into a euro denominated term loan, which exposes us to fluctuations in the euro foreign exchange rate. Therefore, we have designated this foreign currency denominated term loan as a hedge of our net investment in international operations. The non-functional currency term loan is revalued into U.S. dollars at each balance sheet date and the changes in value associated with currency fluctuations are recorded as adjustments to long-term debt with offsetting gains and losses recorded in OCI. The notional amount of the term loan is reduced each quarter as a result of repayments and was \$317.0 million (€216.6 million) at September 30, 2009. We had no hedge ineffectiveness.

The before tax and net of tax effect of our net investment hedge nonderivative financial instrument on OCI for the three and nine months ended September 30 is as follows:

Nonderivative Financial Instruments in ASC 815-20 Net Investment Hedging Relationships Euro Denominated Term Loan Designated as a Hedge of Our Net Investment in International Operations

Tet investment freuging relationships	of Our Net investment in international Operations							
	Thre	Three Months Ended September 30,				ne Months End	ed S	eptember 30,

Before tax	\$	(13,770)	\$	32,043	\$	(9,157)	\$	(366)
Net of tax	\$	(8,533)	\$	19,934	\$	(5,686)	\$	(8)

Derivatives Not Designated as Hedging Relationships

We are also exposed to foreign exchange risk through our intercompany financing transactions. At each period end, foreign currency monetary assets and liabilities, including intercompany balances, are revalued with the change recorded to other income and expense. In the second quarter of 2008, we began entering into monthly foreign exchange forward contracts, not designated for hedge accounting, with the intent to reduce earnings volatility associated with certain foreign currency balances of intercompany financing transactions. During the nine months ended September 30, 2009, we entered into approximately 50 foreign currency option and forward transactions. The notional amounts of the contracts ranged from less than \$1 million to \$44 million, offsetting our exposures primarily from the euro, British pound, Czech koruna, and Hungarian forint.

During 2007, we entered into a cross currency interest rate swap for the purpose of converting our £50 million pound sterling denominated term loan and the pound sterling LIBOR variable interest rate to a U.S. dollar denominated term loan and a U.S. LIBOR interest rate (plus an additional margin of 210 basis points), which was not designated as an accounting hedge. The cross currency interest rate swap had terms similar to the pound sterling denominated term loan, including expected prepayments. This instrument was intended to reduce the impact of volatility between the pound sterling and the U.S. dollar. Therefore, gains and losses were recorded in other income and expense as an offset to the gains (losses) on the underlying term loan revaluation to the U.S. dollar. The amounts paid or received on the interest rate swap were recognized as adjustments to interest expense. In the second quarter of 2008, we repaid the £50 million pound sterling denominated loan.

The effect of our foreign exchange forward and cross currency swap derivative instruments on the Consolidated Statements of Operations for the three and nine months ended September 30 is as follows:

Derivatives Not Designated as Hedging	Gain (Loss) Recognized on Derivatives in Other Income (Expense)										
Instrument under ASC 815-20	Three	Months Ended S	Nine Months Ended September 30,								
		2009		2009	2008

Cross currency interest rate swap		-	-	-	(1,709)						
	\$	(1,976) \$	1,712	\$ (2,503)	(456)						

Note 8: Defined Benefit Pension Plans

We sponsor both funded and unfunded non-U.S. defined benefit pension plans offering death and disability, retirement, and special termination benefits to employees in Germany, France, Spain, Italy, Belgium, Chile, Portugal, Hungary, and Indonesia. The defined benefit obligation is calculated annually by using the projected unit credit method. The measurement date for the pension plans was December 31, 2008.

Our general funding policy for these qualified pension plans is to contribute amounts sufficient to satisfy regulatory funding standards of the respective countries for each plan. Our expected contribution assumes that actual plan asset returns are consistent with our expected rate of return and that interest rates remain constant. For 2009, we expect to contribute a total of \$500,000 to our defined pension benefit plans with the majority payable in the fourth quarter. For the three and nine months ended September 30, 2009, we contributed approximately \$49,000 and \$101,000, respectively, to the defined benefit pension plans. For the three and nine months ended September 30, 2008, we contributed approximately \$33,000 and \$126,000, respectively, to the defined benefit pension plans.

Net periodic pension benefit costs for our plans include the following components:

	Three Months Ended September 30,					Nine Months Ended September 30,				
	2009		2008			2009		2008		
				(in thous	sands)					
Service cost	\$	457	\$	438	\$	1,325	\$	1,616		
Interest cost		933		955		2,673		2,825

Amortization of actuarial net gain		(106)		(44)		(288)		(119)		
Amortization of unrecognized prior service costs		7		13		20		44		
Net periodic benefit cost	\$	1,217	\$	1,284	\$	3,515	\$	4,136		

Note 9: Stock-Based Compensation

We record stock-based compensation expense for awards of stock options, stock issued pursuant to our ESPP, and the issuance of restricted and unrestricted stock awards and units. We expense stock-based compensation using the straight-line method over the vesting requirement period. For the three months ended September 30, 2009 and 2008, stock-based compensation expense was \$4.2 million and \$4.5 million and the related tax benefit was \$1.0 million and \$1.1 million, respectively. For the nine months ended September 30, 2009 and 2008, stock-based compensation expense was \$13.4 million and \$12.5 million and the related tax benefit was \$3.5 million and \$2.9 million, respectively. We have not capitalized any stock-based compensation expense. We issue new shares of common stock upon the exercise of stock options or when vesting conditions on restricted awards are fully satisfied.

The fair value of stock options and ESPP awards issued were estimated at the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions:

	Employee Stock Options (1)								
	Nine Months Ended S	eptember 30,							
	2009	2008							
Dividend yield	-	-							
Expected volatility	50.2%	44.8%							
Risk-free interest rate	1.8%	3.0%							
Expected life (years)	4.91	4.49							

		ESPP								
	Three Months Ended S	September 30,	Nine Months Ended September 30							
	2009	2008	2009	2008						
Dividend yield	-	-	-	-						
Expected volatility	51.9%	36.8%	75.8%	52.6%						
Risk-free interest rate	0.2%	1.9%	0.4%	2.2%						
Expected life (years)	0.25	0.25	0.25	0.25						

(1) There were no Employee Stock Options granted during the three months ended September 30, 2009 and 2008.

Expected volatility is based on a combination of historical volatility of our common stock and the implied volatility of our traded options for the related expected life period. We believe this combined approach is reflective of current and historical market conditions and an appropriate indicator of expected volatility. The risk-free interest rate is the rate available as of the award date on zero-coupon U.S. government issues with a term equal to the expected life of the award. The expected life is the weighted average expected life of an award based on the period of time between the date the award is granted and the date an estimate of the award is fully exercised. Factors considered in estimating the expected life include historical experience of similar awards, with consideration to the contractual terms, vesting schedules, and expectations of future employee behavior. We have not paid dividends in the past and do not plan to pay dividends in the foreseeable future.

Subject to stock splits, dividends, and other similar events, 5,875,000 shares of common stock are reserved and authorized for issuance under our Amended and Restated 2000 Stock Incentive Plan. Of the authorized shares under the plan, no more than 1.0 million shares can be issued as non-stock options (awards). Awards consist of restricted stock units, restricted stock awards, and unrestricted stock awards. At September 30, 2009, shares available for issuance under the plan as either options or awards were 450,638.

Stock Options

Options to purchase our common stock are granted to employees and the Board of Directors with an exercise price equal to the market close price of the stock on the date the Board of Directors approves the grant. Options generally become exercisable in three equal annual installments beginning one year from the date of grant and generally expire 10 years from the date of grant.

The fair value of each stock option granted is estimated on the date of grant using the Black-Scholes option-pricing model. No stock options were granted during the three months ended September 30, 2009 and 2008. The weighted average grant date fair values of the stock options granted during the nine months ended September 30, 2009 and 2008 were \$57.96 and \$39.07 per share, respectively. Compensation expense related to stock options for the three months ended September 30, 2009 and 2008 was \$1.6 million and \$2.2 million, and for the nine months ended September 30, 2009 and 2008 was \$6.2 million and \$6.8 million, respectively. Compensation expense is recognized only for those options expected to vest, with forfeitures estimated based on our historical experience and future expectations.

A summary of our stock option activity for the nine months ended September 30, 2009 and 2008 is as follows:

	Shares	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Life	Int	Aggregate rinsic Value
	(in thousands)		(years)	•	thousands)
Outstanding, January 1, 2008	1,561	\$ 37.81	6.98	\$	90,769
Granted	247	95.79			
Exercised	(399)	26.37			
Forfeited	(19)	46.71			
Outstanding, September 30, 2008	1,390	51.26	7.25	\$	53,578
Exercisable and expected to vest, September 30, 2008	1,324	\$ 49.90	7.16	\$	52,683
Exercisable, September 30, 2008	804	\$ 34.88	6.12	\$	43,182
Outstanding, January 1, 2009	1,374	\$ 51.53	6.99	\$	25,809
Granted	50	57.96			,
Exercised	(134)	20.20			
Forfeited	(18)	58.98			
Expired	(7)	57.23			
Outstanding, September 30, 2009	1,265	54.96	6.66	\$	20,408
Exercisable and expected to vest, September 30, 2009	1,203	\$ 53.22	6.56	\$	20,373
Exercisable, September 30, 2009	971	\$ 46.91	6.11	\$	20,052

The aggregate intrinsic value in the table above is the amount by which the market value of the underlying stock exceeded the exercise price of the outstanding options before applicable income taxes, based on the closing stock price on the last business day of the period, which represents amounts that would have been received by the optionees had all options been exercised on that date. As of September 30, 2009, total unrecognized stock-based compensation expense related to nonvested stock options was approximately \$7.2 million, which is expected to be recognized over a weighted average period of approximately 18 months. During the three months ended September 30, 2009 and 2008, the total intrinsic value of stock options exercised was \$4.2 million and \$12.9 million, respectively. During the nine months ended September 30, 2009 and 2008, the total intrinsic value of stock options exercised was \$4.6 million and \$28.2 million, respectively.

Restricted Stock Units

Certain employees and senior management receive restricted stock units or restricted stock awards (collectively, restricted awards) as a component of their total compensation. The fair value of a restricted award is the market close price of our common stock on the date of grant. Restricted awards generally vest over a three year period. Compensation expense, net of forfeitures, is recognized over the vesting period.

Upon vesting, the restricted awards are converted into shares of our common stock on a one-for-one basis and issued to employees. We are entitled to an income tax deduction in an amount equal to the taxable income reported by the employee upon vesting of the restricted awards. Total compensation expense recognized for restricted awards was \$2.3 million and \$2.0 million for the three months ended September 30, 2009 and 2008, and \$6.6 million and \$5.1 million for the nine months ended September 30, 2009 and 2008. At September 30, 2009, unrecognized compensation expense was \$12.0 million, which is expected to be recognized over a weighted average period of approximately 18 months. The total fair value of awards that vested was \$298,000 and \$1.5 million during the three and nine months ended September 30, 2009, respectively. No awards vested during the three and nine months ended September 30, 2008.

The following table summarizes restricted award activity for the nine months ended September 30, 2009 and 2008:

	Number of Restricted Awards (in thousands)					
Nonvested, January 1, 2008	111	\$	66.92			
Granted	213		84.53			
Forfeited	(12)		74.08			
Nonvested, September 30, 2008	312	\$	78.70			
Nonvested, January 1, 2009	313	\$	78.55			
Granted	59		69.44			
Vested	(23)		64.80			
Forfeited	(6)		77.95			
Nonvested, September 30, 2009	343	\$	73.72			

Unrestricted Stock Awards

We issue unrestricted stock awards to our Board of Directors as part of their compensation. Awards are fully vested at issuance and are expensed when issued. The fair value of unrestricted stock awards is the market close price of our common stock on the date of grant. During the three months ended September 30, 2009 and 2008, we issued 2,168 and 1,184 shares of unrestricted stock with a weighted average grant date fair value of \$55.27 and \$100.74 per share, respectively. During the nine months ended September 30, 2009 and 2008, we issued 4,284 and 2,744 shares of unrestricted stock with a weighted average grant date fair value of \$59.40 and \$97.94 per share, respectively. The expense related to these awards was \$120,000 and \$119,000 for the three months ended September 30, 2009 and 2008, and \$254,000 and \$269,000 for the nine months ended September 30, 2009 and 2008, respectively.

Employee Stock Purchase Plan

Under the terms of the ESPP, eligible employees can elect to deduct up to 10% of their regular cash compensation to purchase our common stock at a discounted price. The purchase price of the common stock is 85% of the fair market value of the stock at the end of each fiscal quarter. The sale of the stock occurs at the beginning of the subsequent quarter. Under the ESPP, we sold 16,663 and 8,672 shares to employees during the three months ended September 30, 2009 and 2008, and 49,413 and 24,647 shares during the nine months ended September 30, 2009 and 2008, respectively. The fair value of ESPP awards is estimated using the Black-Scholes option-pricing model. The fair value of the ESPP awards was \$9.62 and \$16.20 per share for the awards associated with the grant in each of the three month offering periods ended September 30, 2009 and 2008, respectively. The weighted average fair value of the ESPP awards associated with the offering periods during the nine months ended September 30, 2009 and 2008 was \$8.13 and \$15.94 per share, respectively. The expense related to the ESPP was \$115,000 and \$138,000 for the three months ended September 30, 2009 and 2008, and \$394,000 and \$406,000 for the nine months ended September 30, 2009 and 2008, respectively. At September 30, 2009, all compensation cost associated with the ESPP had been recognized. There were approximately 259,000 shares of common stock available for future issuance under the ESPP at September 30, 2009.

Note 10: Income Taxes

Our tax provision (benefit) as a percentage of income (loss) before tax typically differs from the federal statutory rate of 35%, and may vary from period to period, due to the forecasted mix of earnings in domestic and international jurisdictions, new or revised tax legislation and accounting pronouncements, tax credits (including research and development and foreign tax), state income taxes, adjustments to valuation allowances, and interest expense and penalties related to uncertain tax positions, among other items.

Our tax benefits in 2009 and 2008 reflect the benefit of certain interest expense deductions and the election under U.S. Internal Revenue Code Section 338 with respect to the Actaris acquisition in 2007, as well as the forecasted mix of earnings in different tax jurisdictions.

Our tax provision (benefit) as a percentage of income (loss) before tax was (84%) for the three and nine months ended September 30, 2009, compared with 6% and (8%) for the same periods in 2008. We had a tax benefit of \$15.1 million in the third quarter of 2009 compared with tax expense of \$377,000 in the same quarter of 2008. The benefit in the third quarter of 2009 is due primarily to tax elections regarding the repatriation of foreign earnings and the associated foreign tax credits for years 2007, 2008, and 2009, which were finalized during the quarter. In addition, a decrease in projected pretax income in high tax jurisdictions for the year, net decrease in certain reserves for uncertain tax positions in foreign jurisdictions, and a refund of taxes previously paid in foreign tax audits also contributed to the benefit.

Unrecognized tax benefits related to uncertain tax positions were \$45.8 million and \$37.6 million at September 30, 2009 and December 31, 2008, respectively. We classify interest expense and penalties related to uncertain tax positions and interest income on tax overpayments as components of income tax expense. We recognized an expense of \$558,000 and a benefit of \$305,000 during the three months ended September 30, 2009 and 2008, and expenses of \$1.9 million and \$725,000 during the nine months ended September 30, 2009 and 2008, respectively, in interest and penalties. At September 30, 2009 and December 31, 2008, accrued interest was \$4.0 million and \$3.2 million, and accrued penalties were \$4.0 million and \$2.9 million, respectively. Unrecognized tax benefits that would affect our tax provision at September 30, 2009 and December 31, 2008 were \$38.6 million and \$37.0 million, respectively. At September 30, 2009, we expect to pay \$104,000 in income taxes, interest, or penalties related to uncertain tax positions over the next twelve months.

We believe it is reasonably possible that our unrecognized tax benefits may decrease by approximately \$10.0 million within the next twelve months due to a change in method of depreciation for certain foreign subsidiaries and a cash payment associated with an international tax audit.

Note 11: Commitments and Contingencies

Guarantees and Indemnifications

We are often required to obtain letters of credit or bonds in support of our obligations for customer contracts. These letters of credit or bonds typically provide a guarantee to the customer for future performance, which usually covers the installation phase of a contract and may on occasion cover the operations and maintenance phase of outsourcing contracts. At September 30, 2009, in addition to the outstanding standby letters of credit of \$48.4 million issued under our credit facility's \$115 million multicurrency revolver, our Itron International operating segment has a total of \$31.6 million of unsecured multicurrency revolving lines of credit of \$7.4 million. At December 31, 2008, Itron International had a total of \$28.8 million of unsecured multicurrency revolving lines of credit with various financial institutions with total outstanding standby letters of credit of \$6.7 million. Unsecured surety bonds in force were \$69.5 million and \$33.1 million at September 30, 2009 and December 31, 2008, respectively. In the event any such bonds or letters of credit are called, we would be obligated to reimburse the issuer of the letter of credit or bond; however, we do not believe that any currently outstanding bonds or letters of credit will be called.

We generally provide an indemnification related to the infringement of any patent, copyright, trademark, or other intellectual property right on software or equipment within our sales contracts, which indemnifies the customer from and pays the resulting costs, damages, and attorney's fees awarded against a customer with respect to such a claim provided that (a) the customer promptly notifies us in writing of the claim and (b) we have the sole control of the defense and all related settlement negotiations. We also provide an indemnification to our customers for third party claims resulting from damages caused by the negligence or willful misconduct of our employees/agents in connection with the performance of certain contracts. The terms of our indemnifications generally do not limit the maximum potential payments. It is not possible to predict the maximum potential amount of future payments under these or similar agreements.

Legal Matters

We are subject to various legal proceedings and claims of which the outcomes are subject to significant uncertainty. Our policy is to assess the likelihood of any adverse judgments or outcomes related to legal matters, as well as ranges of probable losses. A determination of the amount of the liability required, if any, for these contingencies is made after an analysis of each known issue. A liability is recorded and charged to operating expense when we determine that a loss is probable and the amount can be reasonably estimated. Additionally, we disclose contingencies for which a material loss is reasonably possible, but not probable. Liabilities recorded for legal contingencies at September 30, 2009 were not material to our financial condition or results of operations.

On August 28, 2009, Itron and PT Berca completed a settlement agreement in which litigation against several Itron International subsidiaries and the successor in interest to another company previously owned by Schlumberger Limited (Schlumberger) was dismissed. PT Berca had claimed that it had preemptive rights in the PT Mecoindo joint venture and had sought to nullify the transaction in 2001 whereby Schlumberger transferred its ownership interest in PT Mecoindo to an Itron International subsidiary. The plaintiff also sought to collect damages for the earnings it otherwise would have earned had its alleged preemptive rights been observed. In connection with the settlement, certain portions of the debt of PT Mecoindo were converted to equity and PT Mecoindo was restructured so that Itron and PT Berca became approximately 51:49 owners of PT Mecoindo as of August 28, 2009 and ownership will become equal as of August 28, 2010. This settlement did not, and is not expected to, have a material impact on our financial condition or results of operations.

Health Benefits

We are self insured for a substantial portion of the cost of U.S. employee group health insurance. We purchase insurance from a third party, which provides individual and aggregate stop loss protection for these costs. Each reporting period, we expense the costs of our health insurance plan including paid claims, the change in the estimate of incurred but not reported (IBNR) claims, taxes, and administrative fees (collectively the plan costs). Plan costs were approximately \$5.4 million and \$4.8 million for the three months ended September 30, 2009 and 2008, and approximately \$15.4 million and \$14.3 million for the nine months ended September 30, 2009 and 2008, respectively. The IBNR accrual, which is included in wages and benefits payable, was \$3.4 million and \$3.0 million at September 30, 2009 and December 31, 2008, respectively. Our IBNR accrual and expenses may fluctuate due to the number of plan participants, claims activity, and deductible limits. For our employees located outside of the United States, health benefits are provided primarily through governmental social plans, which are funded through employee and employer tax withholdings.

Warranty

A summary of the warranty accrual account activity is as follows:

	T	hree Months End	led S	September 30,	Nine Months Ended September 30,				
	2009			2008	2009		2008		
				(in thousa	nds)				
Beginning balance	\$	34,065	\$	42,184 \$	38,255	\$	32,841		
Adjustment of previous acquisition		-		713	-		7,655		
New product warranties		2,223		1,856	5,345		5,789		
Other changes/adjustments to warranties		1,641		1,318	4,750		5,405		
Claims activity		(5,067)		(3,908)	(15,788)		(11,424)		
Effect of change in exchange rates		653		(1,563)	953		334		
Ending balance, September 30		33,515	_	40,600	33,515		40,600		
Current portion of warranty		(20,751)		(25,911)	(20,751)		(25,911)		
Long-term warranty	\$	12,764	\$	14,689 \$	12,764	\$	14,689		

Total warranty expense, which consists of new product warranties issued and other changes and adjustments to warranties, totaled approximately \$3.9 million and \$3.2 million for the three months ended September 30, 2009 and 2008, and approximately \$10.1 million and \$11.2 million for the nine months ended September 30, 2009 and 2008, respectively.

Note 12: Other Comprehensive Income (Loss)

Other comprehensive income (loss) is reflected as a net increase (decrease) to shareholders' equity and is not reflected in our results of operations. Total comprehensive income (loss) during the reporting periods, net of tax, was as follows:

	Three Months Ended September 30,			Nine Months September					
		2009	2008	2009	2008				
			(in thousands)						
Net income (loss)	\$	(2,962) \$	5,600 \$	\$ (7,402) \$	17,642				
Foreign currency translation adjustment, net		65,895	(153,626)	62,971	(12,717)				
Net unrealized gain (loss) on derivative instruments, designated as cash flow hedges, net		(2,102)	(2,632)	(5,906)	1,520				
Net unrealized gain (loss) on a nonderivative hedging instrument, net		(8,524)	19,934	(5,676)	(8)				
Net hedging (gain) loss reclassified into net income (loss), net		2,222	(67)	6,025	(294)				
Pension plan benefits liability adjustment, net		(29)	(123)	(187)	(53)				
Total comprehensive income (loss)	\$	54,500 \$	(130,914)	\$ 49,825 \$	6,090				

Income tax (provision) benefit related to other comprehensive income (loss) during the reporting periods was as follows:

	Three Months Ended September 30,			Nine Months Septembe	
		2009 2008		2009	2008
			(in thousa	ınds)	
Income tax (provision) benefit on foreign currency translation adjustment	\$	(1,691) \$	(3,696) \$	(5,367) \$	5,264
Income tax (provision) benefit on net unrealized gain (loss) on derivative instruments ⁽¹⁾		1,266	1,626	3,627	(940)
Income tax (provision) benefit on net unrealized gain (loss) on a nonderivative hedging instrument		5,246	(12,110)	3,481	358
Income tax (provision) benefit on net hedging (gain) loss reclassified into net income (loss)		(1,366)	44	(3,725)	185
Income tax benefit on pension plan benefits liability adjustment		13	9	80	22
Total income tax (provision) benefit on other comprehensive income (loss)	\$	3,468 \$	(14,127) \$	(1,904) \$	4,889

(1) Designated as cash flow hedges

Accumulated other comprehensive income, net of tax, was \$91.3 million at September 30, 2009 and \$34.1 million at December 31, 2008. These amounts consisted of the adjustments for foreign currency translation, the unrealized gain (loss) on our hedging instruments, the hedging gain (loss), and the pension liability adjustment as indicated above.

Note 13: Fair Values of Financial Instruments

The fair values provided are representative of fair values only at September 30, 2009 and December 31, 2008 and do not reflect subsequent changes in the economy, interest rates, tax rates, and other variables that may affect the determination of fair value.

At September 30, 2009				At Decemb	er 3	1, 2008	
Carrying Amount		Fair Value (in tho		Value A			Fair Value
\$	124,721	\$	124,721	\$	144,390	\$	144,390
	292		292		-		-
\$	301,205	\$	302,320	\$	375,744	\$	317,128
	316,981		318,154		360,494		308,073
	205,758		275,433		306,337		380,985
	-		-		109,192		95,478
	18,138		18,138		17,495		17,495
	1,096		1,096		67		67
	<u>, A</u> \$	\$ 124,721 292 \$ 301,205 316,981 205,758 - 18,138	\$ 124,721 \$ 292 \$ 301,205 \$ 316,981 205,758 - 18,138	Carrying Amount Fair Value	Carrying Amount Fair Value \$ 124,721 \$ 124,721 \$ 292 \$ 301,205 \$ 302,320 \$ 316,981 \$ 205,758 275,433 18,138 \$ 18,138 18,138	Carrying Amount Fair Value Carrying Amount \$ 124,721 \$ 124,721 \$ 144,390 292 292 - \$ 301,205 \$ 302,320 \$ 375,744 316,981 318,154 360,494 205,758 275,433 306,337 - - 109,192 18,138 18,138 17,495	Carrying Amount Fair Value Carrying Amount \$ 124,721 \$ 124,721 \$ 144,390 \$ 292 \$ 292 292 - - \$ 301,205 \$ 302,320 \$ 375,744 \$ 316,981 318,154 360,494 205,758 275,433 306,337 - 109,192 18,138 18,138 17,495

The following methods and assumptions were used in estimating fair values:

Cash and cash equivalents: Due to the liquid nature of these instruments, the carrying value approximates fair value.

Term loans: The term loans are not registered with the SEC but are generally transferable through banks that hold the debt and make a market. The fair value is based on quoted prices from recent trades of the term loans.

Convertible senior subordinated notes: The convertible notes are registered with the SEC and are generally transferable. The fair value is based on quoted prices from recent broker trades of the convertible notes. The carrying value is lower than the face value of the convertible notes as a result of separating the liability and equity components. The face value of the convertible notes was \$223.6 million at September 30, 2009 and \$344.6 million at December 31, 2008. See Note 6 for further discussion.

Derivatives: See Note 7 for a description of our methods and assumptions in determining the fair value of our derivatives, which were determined using fair value measurements of significant other observable inputs (Level 2).

Note 14: Segment Information

We have two operating segments: Itron International and Itron North America. Itron International was previously referred to as the Actaris operating segment. We are now operating under the Itron brand on a worldwide basis. Itron International generates a majority of its revenues in Europe, Africa, South America, and Asia/Pacific, while Itron North America generates a majority of its revenues in the United States and Canada. On January 1, 2009, we made refinements to our management reporting and geographic reporting structure between our International and North America operations. Itron North America now includes sales of gas and water meters in North America, which were previously part of Itron International. Therefore, the operating segment information as set forth below is based on our current segment reporting structure. Historical segment information has been restated from the segment information previously provided to conform to our current segment reporting structure after the January 1, 2009 refinement.

We have three measures of segment performance: revenue, gross profit (margin), and operating income (margin). Intersegment revenues were minimal. Corporate operating expenses, interest income, interest expense, gain (loss) on extinguishment of debt, other income (expense), and income tax expense (benefit) are not allocated to the segments, nor included in the measure of segment profit or loss.

Depreciation and amortization expenses are allocated to our segments and were as follows:

	Thre	e Months En	ded Se	ptember 30,	Nine Months Ended September 30				
		2009	2008			2009		2008	
				(in mil	lions)				
Itron North America	\$	12.4	\$	12.7	\$	35.4	\$	34.2	
Itron International		27.0		31.1		78.4		99.1	
Total Company	\$	39.4	\$	43.8	\$	113.8	\$	133.3	

Segment Products

Itron North America

Electronic and smart electricity meters; gas and water meters; electricity, gas, and water automated meter reading (AMR) and advanced metering infrastructure (AMI)/smart meter modules; handheld, mobile, and network AMR data collection technologies; AMI network technologies; software, installation, implementation, consulting, maintenance, support, and other services.

Itron International

Electromechanical, electronic, and smart electricity meters; mechanical and ultrasonic water and heat meters; diaphragm, turbine, and rotary gas meters; one-way and two-way electricity prepayment systems, including smart key, keypad, and smart card; two-way gas prepayment systems using smart card; AMR and AMI data collection technologies; installation, implementation, maintenance support, and other managed services.

No single customer represented more than 10% of total Company or Itron International operating segment revenues for the three and nine months ended September 30, 2009 and 2008. No customer accounted for more than 10% of Itron North America operating segment revenues for the three months ended September 30, 2009 and 2008, and the nine months ended September 30, 2009. One customer accounted for 11% of Itron North America operating segment revenues for the nine months ended September 30, 2008.

Revenues by region were as follows:

	Th	ree Months En	eptember 30,	N	ine Months End	led Se	ptember 30,

Note 15: Consolidating Financial Information

Our subordinated notes and convertible notes, issued by Itron, Inc., are guaranteed by our U.S. domestic subsidiaries, which are 100% owned, and any future domestic subsidiaries. The guarantees are joint and several, full, complete, and unconditional. There are currently no restrictions on the ability of the subsidiary guarantors to transfer funds to the parent company.

On January 1, 2009, we transferred a substantial portion of our guarantor subsidiary operations located in the United States into the parent company. This change in legal entities implemented on January 1, 2009 is reflected in the below consolidating statements as of and for the three and nine months ended September 30, 2009. We have not restated the comparative prior period results due to the complexity of the transfer and the immaterial nature of the operations.

Note 16: Subsequent Events

We have evaluated subsequent events through November 2, 2009, the date of issuance of our condensed consolidated financial statements.

ITEM 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

In this Quarterly Report on Form 10-Q, the terms "we," "us," "our," "Itron," and the "Company" refer to Itron, Inc.

The following discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and notes included in this report and with our Annual Report on Form 10-K for the year ended December 31, 2008 filed with the Securities and Exchange Commission (SEC) on February 26, 2009.

Documents we provide to the Securities and Exchange Commission are available free of charge under the Investors section of our website at www.itron.com as soon as practicable after they are filed with or furnished to the SEC. In addition, these documents are available at the SEC's website (http://www.sec.gov) and at the SEC's Headquarters at 100 F Street, NE, Washington, DC 20549, or by calling 1-800-SEC-0330.

Certain Forward-Looking Statements

This document contains forward-looking statements concerning our operations, financial performance, revenues, earnings growth, liquidity, and other items. This document reflects our current plans and expectations and is based on information currently available as of the date of this Quarterly Report on Form 10-Q. When we use the words "expect," "intend," "anticipate," "believe," "plan," "project," "estimate," "future," "objective," "may," "will," "will continue," and similar expressions, they are intended to identify forward-looking statements. Forward-looking statements rely on a number of assumptions and estimates. These assumptions and estimates could be inaccurate and cause our actual results to vary materially from expected results. Risks and uncertainties include 1) the rate and timing of customer demand for our products, 2) rescheduling or cancellations of current customer orders and commitments, 3) competition, 4) changes in estimated liabilities for product warranties and/or litigation, 5) our dependence on customers' acceptance of new product and their performance, 6) changes in domestic and international laws and regulations, 7) future business combinations, 8) changes in estimates for stock-based compensation or pension costs, 9) changes in foreign currency exchange rates, 10) international business risks, 11) our own and our customers' or suppliers' access to and cost of capital, and 12) other factors. You should not solely rely on these forward-looking statements as they are only valid as of the date of this Quarterly Report on Form 10-Q. We do not have any obligation to publicly update or revise any forward-looking statement in this document. For a more complete description of these and other risks, see "Risk Factors" within Item 1A included in our Annual Report on Form 10-Q for the three months ended March 31, 2008, which was filed with the SEC on February 26, 2009, and Item 1A included in our Quarterly Report on Form 10-Q for the three months ended March 31, 2009, which was filed with the SEC o

Results of Operations

We derive the majority of our revenues from sales of products and services to utilities. Our products and services include hardware, software, managed services, and consulting. Cost of revenues includes materials, labor, overhead, warranty expense, and distribution and documentation costs for software.

Overview

Our 2009 financial results have been negatively impacted by a number of factors including economic uncertainty, a shift in technology choice for some utilities from automated meter reading (AMR) to advanced metering infrastructure (AMI) systems, foreign exchange rate volatility, and delayed purchases for customers awaiting approval of projects that may qualify for stimulus funding through the American Recovery and Reinvestment Act of 2009.

With the current economic environment and foreign exchange rate volatility, we considered it prudent to strengthen our financial position. As a result, during the nine months ended September 30, 2009, we reduced our borrowings by \$357 million, issued \$289 million in common stock, and amended our credit facility to reduce our current and future covenant requirements.

Twelve-month backlog was \$749 million at September 30, 2009, compared with \$436 million at September 30, 2008.

Total Company Revenues, Gross Profit and Margin, and Unit Shipments

		Three Months E	anded Septembe	r 30,	Nine Months Ended September 30,								
		2009	2008	% Change		2009	2008	% Change					
	(in r	nillions, except gross	margin)		(in	millions, except g	gross margin)

Europe	\$	203.9	\$	233.0	\$	610.9	\$	722.4				
United States and Canada		132.1		161.3		402.8		488.3				
Other		72.4		90.5		196.9		266.5				
Total revenues	\$	408.4	\$	484.8	\$	1,210.6	\$	1,477.2				

Revenues

Revenues decreased 16% and 18% for the three and nine months ended September 30, 2009, compared with the same periods in 2008, or \$76.4 million and \$266.6 million, respectively. A strengthening U.S. dollar against most foreign currencies accounted for 32% and 50% of the decrease in revenues for each of the respective periods. A more detailed analysis of these fluctuations is provided in *Operating Segment Results*.

No single customer represented more than 10% of total revenues for the three and nine months ended September 30, 2009 and 2008. Our 10 largest customers accounted for approximately 16% and 12% of total revenues for the three and nine months ended September 30, 2009, and 16% of total revenues for each of the same periods in 2008.

Gross Margins

Gross margin was 32% for the three and nine months ended September 30, 2009, compared with 34% during the same periods in 2008. The decrease in gross margin for the three and nine months ended September 30, 2009 was primarily due to a decline in Itron North America's gross margins. A more detailed analysis of these fluctuations is provided in *Operating Segment Results*.

Meter and Module Summary

Meters are sold with and without advanced functionality (AMR/AMI/smart metering). In addition, smart meter modules can be sold separately from the meter. Depending on customers' preferences, we also incorporate other vendors' technology in our meters. A summary of our meter and AMR/AMI modules are as follows:

	Three Months End	ed September 30,	Nine Months End	ed September 30,
	2009	2008	2009	2008
Total meters (with and without AMR/AMI) Itron North America		(units in the	ousands)	
Electricity	740	1,250	2,340	3,870
Gas	90	100	260	290
Itron International				
Electricity	1,890	2,060	5,670	5,760
Gas	1,160	1,490	3,880	4,040
Water	1,960	2,090	6,540	7,080
Total meters with and without AMR/AMI	5,840	6,990	18,690	21,040
Additional meter information (Total Company)				
Meters with AMR	670	1,150	2,200	3,860
Meters with AMI	120	10	220	20
Standalone AMR/AMI modules	850	1,250	2,860	3,550
Meters with AMR/AMI and modules	1,640	2,410	5,280	7,430
Meters with other vendors' AMR/AMI	160	220	470	620

Operating Segment Results

For a description of our operating segments, see Note 14 of the condensed consolidated financial statements. The following tables and discussion highlight significant changes in trends or components of each operating segment.

	Total Company \$ 9.0		2%	\$	25.3	5%	\$	29.7	2%	\$	88.8	6%					

Itron North America: Revenues decreased \$38.8 million, or 22%, during the three months ended September 30, 2009, and \$108.3 million, or 21%, during the nine months ended September 30, 2009, compared with the same periods in 2008. Revenues in 2008 included electricity meter and AMR module shipments in support of a number of AMR deployments. The lower 2009 revenues were primarily driven by the substantial completion of a number of AMR contracts in 2008 and fewer shipments of electricity meters and AMR modules. Utilities have delayed orders due to the current spending environment and the uncertainty surrounding the announcement and disbursement of stimulus funds.

Gross margin decreased seven percentage points and three percentage points for the three and nine months ended September 30, 2009, compared with the same periods in 2008, primarily due to shipments of our first generation AMI meters, which currently have higher costs, fewer AMR meter and AMR gas module shipments, and reduced overhead absorption resulting from lower overall production levels. Itron North America gross margins are expected to remain at lower levels until we have higher volume shipments of a cost reduced AMI meter.

No customer represented more than 10% of Itron North America operating segment revenues in the three and nine months ended September 30, 2008 and the three months ended September 30, 2008. One customer accounted for 11% of Itron North America operating segment revenues for the nine months ended September 30, 2008, respectively.

Itron North America operating expenses decreased \$4.9 million, or 10%, for the three months ended September 30, 2009 and \$12.2 million, or 8%, for the nine months ended September 30, 2009, compared with the same periods in 2009. Lower sales expenses and general and administrative expenses were the primary factors for the reduced expenses. Operating expenses as a percentage of revenues were 32% for the three and nine months ended September 30, 2009, compared with 28% for the same periods in 2008, as a result of lower revenues in 2009.

Itron International: Revenues decreased \$37.6 million, or 12%, and \$158.3 million, or 17%, for the three and nine months ended September 30, 2009, compared with the same periods in 2008. Excluding the effect of a strengthening U.S. dollar against most foreign currencies as compared with the prior period, revenues declined 4% and 3% for the respective periods as a result of softening demand in some markets due to financial and economic conditions.

Gross margin increased one percentage point for the three months ended September 30, 2009, compared with the same period last year, primarily as a result of lower material costs, such as copper alloys and electronic components. Gross margin decreased one percentage point for the nine months ended September 30, 2009, compared with the same period last year, primarily due to a change in product mix, which included increased service costs in South America, partially offset by lower material costs.

Business line revenues for Itron International were as follows:

	Three Months En	ded September 30,	Nine Months Ended September 30,			
	2009	2008	2009	2008		
Electricity	42%	40%	39%	40%		
Gas	30%	32%	30%	30%		
Water	28%	28%	31%	30%		

No single customer represented more than 10% of Itron International operating segment revenues in the three and nine months ended September 30, 2009 and 2008

Operating expenses for Itron International were \$69.7 million and \$78.0 million for the three months ended September 30, 2009 and 2008, or 26% and 25% of revenues for the respective periods. Operating expenses for the nine months ended September 30, 2009 and 2008 were \$207.4 million and \$237.8 million, or 26% and 25% of revenues for the respective periods. For the three months ended September 30, 2009, amortization of intangible assets decreased by \$4.3 million, while the remaining decrease was the result of a stronger U.S. dollar as compared with the prior year. For the nine months ended September 30, 2009, a stronger U.S. dollar compared with the prior year and a \$17.5 million decline in intangible asset amortization resulted in a decrease in operating expense of \$40.6 million. The decrease was partially offset by slightly higher product development and other operating expenses.

Corporate unallocated: Operating expenses not directly associated with an operating segment are classified as "Corporate unallocated." These expenses decreased \$3.9 million and \$7.8 million in the three and nine months ended September 30, 2009, compared with the same periods last year, due to reductions in compensation expense and reduced consulting fees, primarily for Sarbanes-Oxley Act of 2002 compliance.

Bookings and Backlog of Orders

Bookings for a reported period represent customer contracts and purchase orders received during the period that have met certain conditions, such as regulatory approval. Total backlog represents committed but undelivered contracts and purchase orders at period end. Twelve-month backlog represents the portion of total backlog that we estimate will be recognized as revenue over the next 12 months. Backlog is not a complete measure of our future business as we have significant book-and-ship orders. Bookings and backlog may fluctuate significantly due to the timing of large project awards. In addition, annual or multi-year contracts are subject to rescheduling and cancellation by customers due to the long-term nature of the contracts. Beginning total backlog, plus bookings, minus revenues, will not equal ending total backlog due to miscellaneous contract adjustments, foreign currency fluctuations, and other factors.

Information on bookings and backlog is summarized as follows:

Quarter Ended	•	uarterly lookings	Ending Total Backlog	 Ending 12-Month Backlog
			(in millions)	
September 30, 2009	\$	400	\$ 1,577	\$ 749
June 30, 2009		427	1,573	646
March 31, 2009		625	1,526	471
December 31, 2008		733	1,309	418
September 30, 2008		894	1,012	436

As we enter into AMI agreements to deploy our OpenWay® meter and communications system, we include these contracts in bookings and backlog when regulatory approvals are received or certain other conditions are met. At September 30, 2009, three of our four signed AMI contracts were included in bookings and backlog. Bookings for the first quarter of 2009 included \$257 million related to the San Diego Gas & Electric AMI contract. During the fourth quarter of 2008, \$334 million was booked related to the CenterPoint Energy AMI contract and during the third quarter of 2008, \$470 million was booked related to the Southern California Edison AMI contract. A majority of the value of these AMI contracts are not included in 12-month backlog as these are multi-year contracts.

Operating Expenses

The following table details our total operating expenses in dollars and as a percentage of revenues:

		Three Months Ended September 30,						Nine Months Ended September 30,					
			% of			% of			% of			% of	
	2	2009	Revenue		2008	Revenue		2009	Revenue		2008	Revenue	
	(mi	llions)		(m	illions)		(m	illions)		(m	illions)		
Sales and marketing	\$	37.7	9%	\$	41.3	9%	\$	112.6	9%	\$	127.5	9%	
Product development		31.1	8%		31.8	6%		93.0	8%		92.3	6%	
General and administrative		26.6	7%		34.1	7%		84.1	7%		100.0	7%	
Amortization of intangible assets		25.1	6%		30.4	6%		72.8	6%		93.1	6%	
Total operating expenses	\$	120.5	30%	\$	137.6	28%	\$	362.5	30%	\$	412.9	28%	

Operating expenses decreased 12% for the three and nine months ended September 30, 2009, compared with the same periods in 2008. The \$17.1 million decrease in operating expenses for the three months ended September 30, 2009 was due to lower amortization of intangible assets of \$5.3 million and approximately \$4.3 million related to foreign exchange rate fluctuations, with the remaining decrease due to cost containment measures. For the nine months ended September 30, 2009, operating expenses decreased by \$50.4 million as a result of lower amortization of intangible assets of \$20.3 million and foreign exchange rate fluctuations of \$23.7 million, with the remaining decrease due to cost containment measures. To partially mitigate the reduced revenues, we have implemented, and continue to perform a variety of measures to reduce operating expenses, including, but not limited to, constraining compensation increases and selective headcount reductions.

Other Income (Expense)

The following table shows the components of other income (expense):

	-	Three Months End	led Se	eptember 30,	N	Nine Months End	ed Se	ptember 30,
		2009		2008		2009		2008
				(in thou	sands	s)		
Interest income	\$	(45)	\$	1,962	\$	971	\$	4,846
Interest expense		(15,963)		(19,257)		(46,935)		(67,695)
Amortization of prepaid debt fees		(4,112)		(1,780)		(6,384)		(7,667)
Loss on extinguishment of debt, net		(2,460)		-		(12,800)		-
Other income (expense), net		(4,534)		(281)		(9,445)		(1,938)
Total other income (expense)	\$	(27,114)	\$	(19,356)	\$	(74,593)	\$	(72,454)

Interest income: Interest income decreased in the three and nine months ended September 30, 2009, compared with the same periods in 2008, primarily due to lower interest rates in 2009. Average cash and cash equivalent balances have not significantly fluctuated.

Interest expense: Interest expense decreased 17% and 31% in the three and nine months ended September 30, 2009, compared with the same periods in 2008, primarily due to the decline in the principal balance of our debt outstanding and a decline in the LIBOR interest rate during the first nine months of 2009. The decrease in interest expense was partially offset by an increase in the applicable margin on our term loans in the second quarter of 2009, from 1.75% to 3.50%, related to our term loan agreement amendment, compared with applicable margins of 2.0% to 1.75% during the nine months ended September 30, 2008. At September, 2009, inclusive of our interest rate swaps, 83% of our borrowings were at fixed rates. The average outstanding principal balance on our borrowings was \$963.0 million and \$986.4 million in the three and nine months ended September 30, 2009, compared with \$1.2 billion and \$1.4 billion for the same periods in 2008.

Amortization of prepaid debt fees: The increase in amortization of prepaid debt fees for the three months ended September 30, 2009, compared with the same period in 2008, was primarily due to the redemption of our 7.75% senior subordinated notes (subordinated notes) on July 17, 2009, which resulted in the write-off of \$2.0 million in unamortized prepaid debt fees. Amortization of prepaid debt fees decreased 17% in the nine months ended September 30, 2009, compared with the same period in 2008, due to lower debt repayments. Debt repayments were \$236.5 million for the nine months ended September 30, 2009, compared with \$383.4 million for the nine months ended September 30, 2008. When debt is repaid early, the related portion of unamortized prepaid debt fees is written-off and included in interest expense.

Loss on extinguishment of debt: On July 17, 2009, we redeemed the \$109.6 million remaining principal balance of our subordinated notes at 101.938% of the principal amount, which was \$111.7 million. This redemption resulted in a \$2.5 million loss on extinguishment of debt. During the first quarter of 2009, we entered into exchange agreements with certain holders of our convertible notes to issue, in the aggregate, approximately 2.3 million shares of common stock, valued at \$132.9 million, in exchange for, in the aggregate, \$121.0 million principal amount of the convertible notes, representing 35% of the aggregate principal outstanding at the date of the exchanges. As a result, we recognized a net loss on extinguishment of debt of \$10.3 million, calculated as the inducement loss, plus an allocation of advisory fees less the revaluation gain. For a description of the redemption of our subordinated notes and the induced conversion of a portion of our convertible notes, see Note 6 of the condensed consolidated financial statements.

Other income (expense), net: In the three and nine months ended September 30, 2009, other expenses, net, resulted primarily from net foreign currency losses due to the revaluation of monetary asset and liability balances denominated in a currency other than the reporting entity's functional currency and \$1.5 million in legal and advisory fees associated with the amendment to our credit facility. In the three and nine months ended September 30, 2008, other expenses, net, resulted primarily from net foreign currency losses due to the revaluation of monetary asset and liability balances denominated in a currency other than the reporting entity's functional currency.

Financial Condition

Cash Flow Information:

	Nine	Months End	ed Septe	mber 30,
		2009		2008
		(in mil	lions)	
Operating activities	\$	87.1	\$	156.2
Investing activities		(35.2)		(40.1)
Financing activities		(76.5)		(61.3)
Effect of exchange rates on cash and cash equivalents		4.9		0.6
Increase in cash and cash equivalents	\$	(19.7)	\$	55.4

Cash and cash equivalents was \$124.7 million at September 30, 2009, compared with \$144.4 million at December 31, 2008. The decrease was primarily due to lower operating results and higher repayments of borrowings in excess of net proceeds from public offerings of common stock.

Operating activities

Cash provided by operating activities for the nine months ended September 30, 2009 was \$69.1 million lower, compared with the same period in 2008, primarily due to lower earnings.

Investing activities

Net cash used in investing activities decreased 12% in the nine months ended September 30, 2009, compared with the same period in 2008, primarily due to delayed purchases of machinery and equipment. Payment of contingent consideration totaling \$1.3 million in 2009 was related to our 2006 acquisitions of ELO Sistemas e Tecnologia Ltda and Quantum Consulting, Inc.

Financing activities

During the nine months ended September 30, 2009, we repaid \$236.5 million in borrowings, compared with \$384.4 million during the same period in 2008. On June 3, 2009, we completed a public offering of approximately 3.2 million shares of common stock for net proceeds of \$160.4 million. In 2008, we completed a public offering of approximately 3.4 million shares of common stock resulting in net proceeds of \$310.9 million. On July 17, 2009, we redeemed our 7.75% senior subordinated notes at 101.938% of the principal amount.

Cash generated from the exercise of stock-based awards was \$5.0 million for the nine months ended September 30, 2009, compared with \$12.4 million during the same period in 2008.

Effect of exchange rates on cash and cash equivalents

The effect of exchange rates on the cash balances of currencies held in foreign denominations for the nine months ended September 30, 2009 was an increase of \$4.9 million, compared with an increase of \$569,000 for the same period in 2008.

Non-cash transactions

During the first quarter of 2009, we completed exchanges with certain holders of our convertible notes in which we issued, in the aggregate, approximately 2.3 million shares of common stock valued at \$132.9 million, in exchange for, in the aggregate, \$121.0 million principal amount of the convertible notes. See Note 6 of the condensed consolidated financial statements for a further discussion. In the second quarter of 2009, contingent consideration of \$2.0 million became payable related to our 2006 acquisition of Flow Metrix, Inc. Payment is expected in the fourth quarter of 2009.

Off-balance sheet arrangements

We have no off-balance sheet financing agreements or guarantees as defined by Item 303 of Regulation S-K at September 30, 2009 and December 31, 2008 that we believe are reasonably likely to have a current or future effect on our financial condition, results of operations, or cash flows.

Liquidity, Sources and Uses of Capital:

Our principal sources of liquidity are cash flows from operations, borrowings, and sales of common stock. Cash flows may fluctuate and are sensitive to many factors including changes in working capital and the timing and magnitude of capital expenditures and payments on debt.

For a description of our credit facility, senior subordinated notes, and convertible senior subordinated notes, see Note 6 of the condensed consolidated financial statements.

With the current economic environment and volatile foreign exchange rates, we considered it prudent to strengthen our financial position. In addition to our *financing activities* and *non-cash transactions* discussed above, in April 2009, we amended our credit facility to adjust our maximum leverage ratio and the minimum interest coverage ratio. The amendment also allows us to seek a \$75 million increase to the \$115 million multicurrency revolving line-of-credit without further amendment. The current lending participants may then choose to increase their level of participation or approve the participation of additional lenders. (The amendment was filed with the SEC on April 27, 2009 as Exhibit 4.1 to our Current Report on Form 8-K.) This option will provide further potential sources of liquidity to allow us to support the growth of our business. At September 30, 2009, there were no borrowings outstanding under the revolver, and \$48.4 million was utilized by outstanding standby letters of credit, resulting in \$66.6 million being available for additional borrowings.

Other Sources and Uses of Capital

For a description of our letters of credit and performance bonds, see Note 11 of the condensed consolidated financial statements. For a description of our funded and unfunded non-U.S. defined benefit pension plans and our expected 2009 contributions, see Note 8 of the condensed consolidated financial statements.

Our net deferred income tax assets consist primarily of accumulated net operating loss carryforwards, hedging activities, and tax credits that can be carried forward, some of which are limited by Internal Revenue Code Sections 382 and 383. The limited deferred income tax assets resulted primarily from acquisitions. Based on current projections, we expect to pay \$646,000 in U.S. federal and state taxes and approximately \$26.9 million in local and foreign taxes in 2009. See Note 10 of the condensed consolidated financial statements for a discussion of our tax provision (benefit) and unrecognized tax benefits.

Working capital, which represents current assets less current liabilities, was \$299.4 million at September 30, 2009, compared with \$293.3 million at December 31, 2008.

We expect to continue to expand our operations and grow our business through a combination of internal new product development, licensing technology from or to others, distribution agreements, partnership arrangements, and acquisitions of technology or other companies. We expect these activities to be funded with existing cash, cash flow from operations, borrowings, and the sale of common stock or other securities. We believe existing sources of liquidity will be sufficient to fund our existing operations and obligations for the next 12 months and into the foreseeable future, but offer no assurances. Our liquidity could be affected by the stability of the energy and water industries, competitive pressures, international risks, intellectual property claims, capital market fluctuations, and other factors described under "Risk Factors" within Item 1A of Part I of our Annual Report on Form 10-K for the fiscal year ended December 31, 2008, which was filed with the SEC on February 26, 2009, and Item 1A of Part II of our Quarterly Report on Form 10-Q for the three months ended March 31, 2009, which was filed with the SEC on May 5, 2009, as well as in our "Quantitative and Qualitative Disclosures About Market Risk" within Item 3 of Part 1, included in this Quarterly Report on Form 10-Q.

Contingencies

See Note 11 of the condensed consolidated financial statements.

Critical Accounting Estimates

Revenue Recognition

The majority of our revenue arrangements involve multiple elements, which require us to determine the estimated fair value of each element and then allocate the total arrangement consideration among the separate elements based on the relative fair value percentages. Revenues for each element are then recognized based on the type of element, such as 1) when the products are shipped, 2) services are delivered, 3) percentage-of-completion when implementation services are essential to other elements in the arrangements, 4) upon receipt of customer acceptance, or 5) transfer of title. A majority of our revenue is recognized when products are shipped to or received by a customer or when services are provided.

Fair values represent the estimated price charged when an item is sold separately. If the fair value of any undelivered element included in a multiple element arrangement cannot be objectively determined, revenue is deferred until all elements are delivered and services have been performed, or until fair value can objectively be determined for any remaining undelivered elements. We review our fair values on an annual basis or more frequently if a significant trend is noted.

If implementation services are essential to a software arrangement, revenue is recognized using either the percentage-of-completion methodology if project costs can be estimated or the completed contract methodology if project costs cannot be reliably estimated. The estimation of costs through completion of a project is subject to many variables such as the length of time to complete, changes in wages, subcontractor performance, supplier information, and business volume assumptions. Changes in underlying assumptions/estimates may adversely or positively affect financial performance. Hardware and software post-sale maintenance support fees are recognized ratably over the performance period. Shipping and handling costs and incidental expenses billed to customers are recorded as revenue, with the associated cost charged to cost of revenues. We record sales, use, and value added taxes billed to our customers on a net basis

Unearned revenue is recorded when a customer pays for products or services where the criteria for revenue recognition have not been met as of the balance sheet date. Unearned revenues relate primarily to professional services and software associated with our OpenWay contracts, extended warranty, and prepaid post contract support. Unearned revenue is recognized when the applicable revenue recognition criteria are met. Deferred cost is recorded for products or services for which ownership (typically defined as title and risk of loss) has transferred to the customer, but for which the criteria for revenue recognition have not been met as of the balance sheet date. Previously recorded unearned revenue and deferred costs are recognized when the applicable revenue recognition criteria are met. See Note 1 of the condensed consolidated financial statements for unearned revenue and deferred costs outstanding at September 30, 2009 and December 31, 2008.

Warranty

We offer standard warranties on our hardware products and large application software products. We accrue the estimated cost of warranty claims based on historical and projected product performance trends and costs. Testing of new products in the development stage helps identify and correct potential warranty issues prior to manufacturing. Continuing quality control efforts during manufacturing reduce our exposure to warranty claims. If our quality control efforts fail to detect a fault in one of our products, we could experience an increase in warranty claims. We track warranty claims to identify potential warranty trends. If an unusual trend is noted, an additional warranty accrual may be assessed and recorded when a failure event is probable and the cost can be reasonably estimated. When new products are introduced, our process relies on historical averages until sufficient data are available. As actual experience becomes available, it is used to modify the historical averages to ensure the expected warranty costs are within a range of likely outcomes. Management continually evaluates the sufficiency of the warranty provisions and makes adjustments when necessary. The warranty allowances may fluctuate due to changes in estimates for material, labor, and other costs we may incur to repair or replace projected product failures, and we may incur additional warranty and related expenses in the future with respect to new or established products, which could adversely affect our gross margin. The long-term warranty balance includes estimated warranty claims beyond one year.

Inventories

Items are removed from inventory using the first-in, first-out method. Inventories include raw materials, sub-assemblies, and finished goods. Inventory amounts include the cost to manufacture the item, such as the cost of raw materials, labor, and other applied direct and indirect costs. We also review idle facility expense, freight, handling costs, and wasted materials to determine if abnormal amounts should be recognized as current-period charges. We review our inventory for obsolescence and marketability. If the estimated market value, which is based upon assumptions about future demand and market conditions, falls below the original cost, the inventory value is reduced to the market value. If technology rapidly changes or actual market conditions are less favorable than those projected by management, inventory write-downs may be required. Our inventory levels may vary period to period as a result of our factory scheduling and timing of contract fulfillments.

Goodwill and Intangible Assets

Goodwill and intangible assets result from our acquisitions. We use estimates, including estimates of useful lives of intangible assets, the amount and timing of related future cash flows, and fair values of the related operations, in determining the value assigned to goodwill and intangible assets. Our intangible assets have a finite life and are amortized over their estimated useful lives based on estimated discounted cash flows. Intangible assets are tested for impairment when events or changes in circumstances indicate the carrying value may not be recoverable.

We test goodwill for impairment each year as of October 1, or more frequently should a significant impairment indicator occur. Our Itron North America operating segment represents one reporting unit, while our Itron International operating segment has three reporting units.

Determining the fair value of a reporting unit is judgmental in nature and involves the use of significant estimates and assumptions. We forecast discounted future cash flows at the reporting unit level using risk-adjusted discount rates and estimated future revenues and operating costs, which take into consideration factors such as existing backlog, expected future orders, supplier contracts, and expectations of competitive and economic environments. We also identify similar publicly traded companies and develop a correlation, referred to as a multiple, to apply to the operating results of the reporting units. Our 2008 annual goodwill impairment analysis did not result in an impairment charge as the fair value of each reporting unit exceeded its carrying value. The percentage by which the fair value of each reporting unit exceeded its carrying value and the amount of goodwill allocated to each reporting unit at October 1, 2008 was as follows:

			Fair Value Exceeded
	Go	oodwill	Carrying Value
		October	1, 2008
	(in ı	nillions)	
Itron North America	\$	127.6	224%
Itron International - Electricity		377.8	29%
Itron International - Gas		402.9	16%
Itron International - Water		408.6	18%
	\$	1,316.9	

Changes in market demand, the volatility and decline in the worldwide equity markets, and the decline in our market capitalization could negatively impact our annual goodwill impairment test, which could have a significant effect on our current and future results of operations and financial condition.

Stock-Based Compensation

We measure and recognize compensation expense for all stock-based awards made to employees and directors, including awards of stock options, stock issued pursuant to our Employee Stock Purchase Plan (ESPP), and the issuance of restricted and unrestricted stock awards and units, based on estimated fair values. The fair values of stock options and ESPP awards are estimated at the date of grant using the Black-Scholes option-pricing model, which includes assumptions for the dividend yield, expected volatility, risk-free interest rate, and expected life. In valuing our stock-based awards, significant judgment is required in determining the expected volatility of our common stock and the expected life that individuals will hold their stock-based awards prior to exercising. Expected volatility is based on the historical and implied volatility of our own common stock. The expected life of stock option grants is derived from the historical actual term of option grants and an estimate of future exercises during the remaining contractual period of the option. While volatility and estimated life are assumptions that do not bear the risk of change subsequent to the grant date of stock-based awards, these assumptions may be difficult to measure as they represent future expectations based on historical experience. Further, our expected volatility and expected life may change in the future, which could substantially change the grant-date fair value of future awards of stock options and ultimately the expense we record. For restricted and unrestricted stock awards and units, the fair value is the market close price of our common stock on the date of grant. We consider many factors when estimating expected forfeitures, including types of awards, employee class, and historical experience. Actual results and future estimates may differ substantially from our current estimates. We expense stock-based compensation, adjusted for estimated forfeitures, using the straight-line method over the vesting requirement. A substantial portion

Defined Benefit Pension Plans

We sponsor both funded and unfunded non-U.S. defined benefit pension plans. We recognize a liability for the projected benefit obligation in excess of plan assets or an asset for plan assets in excess of the projected benefit obligation. We also recognize the funded status of our defined benefit pension plans on our Consolidated Balance Sheets and recognize as a component of other comprehensive income, net of tax, the actuarial gains or losses and prior service costs or credits, if any, that arise during the period but are not recognized as components of net periodic benefit cost.

Several economic assumptions and actuarial data are used in calculating the expense and obligations related to these plans. The assumptions are updated annually at December 31 and include the discount rate, the expected remaining service life, the expected rate of return on plan assets, and rate of future compensation increase. The discount rate is a significant assumption used to value our pension benefit obligation. We use the average 15 year corporate bond yield curve from the central banks of each respective country in which we have an established benefit pension plan. The weighted average discount rate used to measure the projected benefit obligation as of December 31, 2008 was 6.52%. A change of 25 basis points in the discount rate would change our pension benefit obligation by approximately \$2 million. The financial and actuarial assumptions used at December 31, 2008 may differ materially from actual results due to changing market and economic conditions and other factors. These differences could result in a significant change in the amount of pension expense recorded in future periods. Gains and losses resulting from changes in actuarial assumptions, including the discount rate, are recognized in other comprehensive income in the period in which they occur.

Our general funding policy for these qualified pension plans is to contribute amounts at least sufficient to satisfy funding standards of the respective countries for each plan. See Note 8 of the condensed consolidated financial statements for our expected contributions for the year.

Convertible Debt

ASC 470, which was originally issued as Financial Accounting Standards Board (FASB) Staff Position (FSP) APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)* (FSP 14-1), requires our convertible debt to be separated into its liability and equity components in a manner that reflects our non-convertible debt borrowing rate, which we determined to be 7.38% at the time of the issuance of the convertible notes issuance in August 2006. Upon derecognition of the convertible notes, we are required to remeasure the fair value of the liability and equity components using a borrowing rate for similar non-convertible debt that would be applicable to Itron at the date of the derecognition. Any increase or decrease in borrowing rates from the inception of the debt to the date of derecognition could result in a gain or loss, respectively, on extinguishment. Based on market conditions and our credit rating at the date of derecognition, the borrowing rate could be materially different from the rate determined at the inception of the convertible debt.

Income Taxes

We estimate income taxes in each of the taxing jurisdictions in which we operate. Changes in our effective tax rate are subject to several factors, including fluctuations in the forecasted mix of earnings in domestic and international jurisdictions, new or revised tax legislation and accounting pronouncements, tax credits (including research and development and foreign tax), and state income taxes. Significant judgment is required in determining our annual tax rate and in evaluating our tax positions. We assess the likelihood that deferred tax assets, which include net operating loss carryforwards and temporary differences expected to be deductible in future years, will be recoverable.

We record valuation allowances to reduce deferred income tax assets to the extent we believe it is more likely than not that a portion of such assets will not be realized. In making such determinations, we consider all available positive and negative evidence, including scheduled reversals of deferred income tax liabilities, projected future taxable income, tax planning strategies, and our ability to carry back losses to prior years. We are required to make assumptions and judgments about potential outcomes that lie outside management's control. Our most sensitive and critical factor is projected future taxable income. Although realization is not assured, management believes it is more likely than not that deferred tax assets will be realized. The amount of deferred tax assets considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carryforward periods are reduced or current tax planning strategies are not implemented.

We are subject to audit in multiple taxing jurisdictions in which we operate. These audits may involve complex issues, which may require an extended period of time to resolve. We believe we have recorded adequate income tax provisions and reserves for uncertain tax positions.

In evaluating uncertain tax positions, we consider the relative risks and merits of positions taken in tax returns filed and to be filed, considering statutory, judicial, and regulatory guidance applicable to those positions. We make assumptions and judgments about potential outcomes that lie outside management's control. To the extent the tax authorities disagree with our conclusions and depending on the final resolution of those disagreements, our effective tax rate may be materially affected in the period of final settlement with the tax authorities.

Derivative Instruments

All derivative instruments, whether designated in hedging relationships or not, are recorded on the Consolidated Balance Sheets at fair value as either assets or liabilities. The components and fair values of our derivative instruments, which are primarily interest rate swaps, are determined using the fair value measurements of significant other observable inputs (also known as "Level 2"), as defined by FASB ASC 820-10-20, *Fair Value Measurements*. We include the effect of our counterparty credit risk based on current published credit default swap rates when the net fair value of our derivative instruments are in a net asset position and the effect of our own nonperformance risk when the net fair value of our derivative instruments are in a net liability position. If the derivative is designated as a fair value hedge, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings. If the derivative is designated as a cash flow hedge, the effective portions of changes in the fair value of the derivative are recorded as a component of other comprehensive income and are recognized in earnings when the hedged item affects earnings. If the derivative is a net investment hedge, the effective portion of any unrealized gain or loss is reported in accumulated other comprehensive income as a net unrealized gain or loss on derivative instruments. Ineffective portions of fair value changes or the changes in fair value of derivative instruments that do not qualify for hedging activities are recognized in other income (expense) in the Consolidated Statements of Operations. We classify cash flows from our derivative programs as cash flows from operating activities in the Consolidated Statements of Cash Flows. Derivatives are not used for trading or speculative purposes. We have one counterparty to our derivatives, which is a major international financial institution, with whom we have a master netting agreement; however, our derivative positions are not discl

New Accounting Pronouncements

See Note 1 of the condensed consolidated financial statements.

Item 3: Quantitative and Qualitative Disclosures about Market Risk

In the normal course of business, we are exposed to interest rate and foreign currency exchange rate risks that could impact our financial position and results of operations. As part of our risk management strategy, we use derivative financial instruments to hedge certain foreign currency and interest rate exposures. Our objective is to offset gains and losses resulting from these exposures with losses and gains on the derivative contracts used to hedge them, therefore reducing the impact of volatility on earnings or protecting fair values of assets and liabilities. We use derivative contracts only to manage existing underlying exposures. Accordingly, we do not use derivative contracts for trading or speculative purposes.

Interest Rate Risk

The table below provides information about our financial instruments that are sensitive to changes in interest rates and the scheduled minimum repayment of principal and estimated cash interest payments over the remaining lives of our debt at September 30, 2009. As a result of our interest rate swaps at September 30, 2009, 83% of our borrowings are at fixed rates. Weighted average variable rates in the table are based on implied forward rates in the Bloomberg U.S. dollar yield curve as of September 30, 2009, our estimated leverage ratio, which determines our additional interest rate margin, and a static foreign exchange rate at September 30, 2009.

				Beyond

Average interest rate (Receive)	2.74%		3.03%		3.70%		4.14%					
Net/Spread	(3.85%)	(3.56%))	(2.89%)	(2.45%)					

⁽¹⁾ The face value of our convertible notes is \$223.6 million, while the carrying value is \$205.8 million. (See Note 6 for a summary of our convertible note terms and a reconciliation between the face and carrying values). Our convertible notes mature in August 2026. Although we have no current plans to exercise our call option, we are amortizing the remaining \$17.8 million discount on the liability component of the convertible notes over the next 21 months and have reflected the principal repayment in 2011 due to the combination of put, call, and conversion options that are part of the terms of the convertible note agreement.

Based on a sensitivity analysis as of September 30, 2009, we estimate that if market interest rates average one percentage point higher in 2009 than in the table above, our earnings before income taxes in 2009 would not be materially impacted due to our interest rate swaps in place at September 30, 2009.

We continually monitor and assess our interest rate risk and may institute additional interest rate swaps or other derivative instruments to manage such risk in the future.

⁽²⁾The one-year interest rate swaps are used to convert \$200 million of our \$301.2 million U.S. dollar term loan from a floating interest rate to a fixed interest rate (see Note 7 of the condensed consolidated financial statements).

⁽³⁾The amortizing euro denominated interest rate swap is used to convert \$280.4 million (€191.6 million) of our \$317.0 million (€216.6 million) euro denominated variable rate term loan from a floating three-month Euro Interbank Offered Rate (EURIBOR), plus an additional margin, to a fixed rate of 6.59%, through December 31, 2012, plus an additional margin. As a result of the amortization schedule, the interest rate swap will terminate before the stated maturity of the term loan. This variable-to-fixed interest rate swap is considered a highly effective cash flow hedge (see Note 7 of the condensed consolidated financial statements).

Foreign Currency Exchange Rate Risk

We conduct business in a number of countries. As a result, the majority of our revenues and operating expenses are denominated in foreign currencies; therefore, we face exposure to movements in foreign currency exchange rates that could have a material effect on our financial results. Our primary foreign currency exposure relates to non-U.S. dollar denominated transactions in our international subsidiary operations, the most significant of which is the euro. International revenues were 66% and 68% for the three and nine months ended September 30, 2009, compared with 66% and 67% for the same periods in 2008

We are exposed to foreign exchange risk through our international subsidiaries. As a result of our acquisition of an international company, we entered into a euro denominated term loan, which exposes us to fluctuations in the euro foreign exchange rate. Therefore, we have designated this foreign currency denominated term loan as a hedge of our net investment in international operations. The non-functional currency term loan is revalued into U.S. dollar at each balance sheet date and the changes in value associated with currency fluctuations are recorded as adjustments to long-term debt with offsetting gains and losses recorded in OCI. We had no hedge ineffectiveness. (See Note 7 of the condensed consolidated financial statements.)

We are also exposed to foreign exchange risk through our intercompany financing transactions. At each period end, foreign currency monetary assets and liabilities, including intercompany balances, are revalued with the change recorded to other income and expense. In the second quarter of 2008, we began entering into monthly foreign exchange forward contracts, not designated for hedge accounting, with the intent to reduce earnings volatility associated with certain foreign currency balances of intercompany financing transactions. During the nine months ended September 30, 2009, the notional amount of our outstanding forward contracts ranged from less than \$1 million to \$44 million offsetting exposures from the euro, British pound, Czech koruna, and Hungarian forint.

In future periods, we may use additional derivative contracts to protect against foreign currency exchange rate risks.

Item 4: Controls and Procedures

- (a) Evaluation of disclosure controls and procedures. An evaluation was performed under the supervision and with the participation of our Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e)) under the Securities Exchange Act of 1934 as amended. Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that as of September 30, 2009, the Company's disclosure controls and procedures were effective to ensure the information required to be disclosed by an issuer in the reports that it files or submits under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.
- (b) Changes in internal controls over financial reporting. There have been no changes in internal control over financial reporting during the quarter ended September 30, 2009 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II: OTHER INFORMATION

Item 1: Legal Proceedings

There were no material changes, as defined by Item 103 of Regulation S-K, during the third quarter of 2009.

Item 1A: Risk Factors

There were no material changes to risk factors during the third quarter of 2009 from those previously disclosed in Item 1A of Part I of our Annual Report on Form 10-K for the fiscal year ended December 31, 2008, which was filed with the SEC on February 26, 2009, and Item 1A of Part II of our Quarterly Report on Form 10-Q for the three months ended March 31, 2009, which was filed with the SEC on May 5, 2009.

Item 4: Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of shareholders of Itron during the third quarter of 2009.

Item 5: Other Information

- (a) No information was required to be disclosed in a report on Form 8-K during the third quarter of 2009 that was not reported.
- (b) Not applicable.

STATEMENT RE COMPUTATION OF RATIOS

	Nine Months Ended		Year Ended December 31,								
	September 30,	2009	2008	2007	2006	2005		2004			
	(in thousands, except ratios)										
Earnings:											
Pre-tax income (loss) ⁽⁵⁾	\$	(44,919) \$	18,582 \$	\$ (43,550)	\$ 47,594	\$ 27,528	\$	(9,406)			
Less: income from equity investees		90	93	358	33	82					
		(45,009)	18,489	(43,908)	47,561	27,446		(9,406)			
Fixed charges ⁽¹⁾ :											
Interest expense, gross (2) (5)		53,319	94,177	100,935	22,426	18,944		13,145			
Interest portion of rent expense		3,874	5,163	4,098	2,241	2,512		2,696			
a) Fixed charges		57,193	99,340	105,033	24,667	21,456		15,841			
b) Earnings for ratio (3)	\$	12,184 \$	117,829	\$ 61,125	\$ 72,228	\$ 48,902	\$	6,435			
Ratios: Earnings to fixed charges ^(b/a)		- (4)	1.2	-(4	4) 2.9	2.3	i	-(4)			
Deficit of earnings to fixed charges	\$	(45,009) \$	- 9	§ (43.908)	\$ -	\$ -	· \$	(9.406)			

⁽¹⁾ Fixed charges consist of interest on indebtedness and amortization of debt issuance costs plus that portion of lease rental expense representative of the interest factor.

⁽²⁾ Interest expense, gross, includes amortization of prepaid debt fees and discount.

⁽³⁾ Earnings for ratio consist of income (loss) from continuing operations before income taxes, less income (loss) from equity investees, plus fixed charges.

⁽⁴⁾ Due to Itron's losses in the nine months ended September 30, 2009, and the years ended December 31, 2007 and 2004, the coverage ratio was less than 1:1. Additional earnings of \$45,009, \$43,908, and \$9,406 would have been needed to achieve a coverage ratio of 1:1 in each of those respective periods.

⁽⁵⁾ On January 1, 2009, we adopted FSP 14-1 and applied it retrospectively to all periods for which our convertible notes was outstanding. Our convertible notes were issued in August 2006. Therefore, pre-tax income (loss) and interest expense, gross reflect this restatement beginning in the year ended December 31, 2006. Refer to Note 1 of the condensed consolidated financial statements for further disclosure of the adoption of FSP 14-1

CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350 AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Malcolm Unsworth, certify that:

- 1. I have reviewed this Quarterly Report on Form 10-Q of Itron, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations, and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about
 the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such
 evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting, which are reasonably likely to adversely affect the registrant's ability to record, process, summarize, and report financial information; and
 - b) Any fraud, whether or not material that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350 AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Steven M. Helmbrecht, certify that:

- 1. I have reviewed this Quarterly Report on Form 10-Q of Itron, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations, and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting, which are reasonably likely to adversely affect the registrant's ability to record, process, summarize, and report financial information; and
 - b) Any fraud, whether or not material that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

ITRON, INC.

By: /s/ STEVEN M. HELMBRECHT

Steven M. Helmbrecht Sr. Vice President and Chief Financial Officer

Date: November 2, 2009

CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350 AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

The certification set forth below is being submitted in connection with the Quarterly Report of Itron, Inc. (the Company) on Form 10-Q for the quarterly period ended September 30, 2009 (the Report) for the purpose of complying with Rule 13a-14(b) or Rule 15d-14(b) of the Securities Exchange Act of 1934 and Section 1350 of Chapter 63 of Title 18 of the United States Code.

Malcolm Unsworth, the Chief Executive Officer and Steven M. Helmbrecht, the Chief Financial Officer of the Company, each certifies that to the best of his knowledge:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
