

## Itron Begins Deployment of 1 Million Communication Modules for ATCO Gas

LIBERTY LAKE, Wash.--(BUSINESS WIRE)-- Itron Inc. (NASDAQ: ITRI) announced today that it has begun installing the first of 1 million [100G Datalogging gas ERT<sup>®</sup> modules](#) for Alberta-based ATCO Gas. Over the course of the four year deployment, Itron will manage all aspects of the effort, including project management and endpoint installation.

"We are delighted to work with ATCO Gas on this project, and we look forward to being there every step of the way to ensure its success," said Carl Porter, director of gas product marketing, Itron. "Itron technology provides a cost-effective, adaptable platform for our customers to operate more efficiently."

Itron's [ChoiceConnect<sup>™</sup>](#) gas metering solution will be used to leverage the 100G modules and their proven remote data collection technology to automate the meter reading process and collect reliable monthly reads. This technology improves billing accuracy and enhances customer convenience, while creating significant operational efficiencies and reducing potential safety risks for field workers.

"Fully automating our meter reading technology reflects ATCO Gas's continuing commitment to provide customers with safe, reliable, cost-effective natural gas service," said Brian Hahn, president, ATCO Gas.

### About Itron:

At Itron, we're dedicated to delivering end-to-end smart grid and smart distribution solutions to electric, gas and water utilities around the globe. Our company is the world's leading provider of smart metering, data collection and utility software systems, with nearly 8,000 utilities worldwide relying on our technology to optimize the delivery and use of energy and water. Our offerings include electricity, gas, water and heat meters; network communication technology; collection systems and related software applications; and professional services.
